Mr. Kevin White, P.E.
Florida Department of Environmental Protection
160 Governmental Center
Pensacola, FL 32501-5794

Subject: Permit No.: 0050008-001-AO
Facility ID No.: 0050008
Project: Air Operation Permit
Renewal Application
Due Date: April 30, 2004
Expiration Date: June 30, 2004

Dear Mr. White:

We intend to renew the subject Air Operation Permit for our Asphalt Plant and enclosed please find four (4) copies of the Application for the Air Permit Renewal. Also enclosed is the applicable fee of $1,500.00 for the baghouse.

In the subject Air Permit our Asphalt Heater is identified as an emissions source with the following specific conditions:

* Fired with a maximum of 16 gallons per hour of No. 2 fuel oil with a maximum of 0.8 sulfur by weights.

* The maximum hours of operation are 3,640 hour per year.

Based on these specific conditions, we are requesting a generic exemption per Rule 62-210.300 (3) (b) and this heater by exempt from our permit. This request was discussed with Mr. Bob Kriegle (FDEP Pensacola) by Mr. Joe Dodd on April 19, 2004, and he did preliminary calculations based on the above specific conditions to verify this exemption. In conclusion the potential emissions do not exceed the Rule limit of 5 tons per year of specific compounds. Therefore, we are not including a fee in this application for the heater.

We greatly appreciate the Department's considering this renewal. If any additional information is required, please do not hesitate to contact us at your convenience.

Sincerely,

Richard M. Dodd, P.E.
President

III. EMISSIONS UNIT INFORMATION

A separate Emissions Unit Information Section must be completed for each emissions unit addressed in this Application for Non-Title V Air Permit Renewal. If submitting the form in hard copy, indicate, in the space provided at the top of each page, the Emissions Unit ID of the emissions unit addressed on the page, as given in the unit's most current air operation permit.

Emissions Unit Description and Status

1. Description of Emissions Unit Addressed in This Section (limit to 60 characters): Estee baghouse for emission control of the Asphalt Plant	
2. Emissions Unit Status Code: A	3. Long-Term Reserve Shutdown Date:
4. Control Equipment Method/Description (limit to 200 characters per device or method): This emissions unit consists of a baghouse (Estee Model ST-12-468) which provides emissions control for the 189 ton per hour batch asphalt plant (Madison, 3-ton batch)	

Emissions Unit Operating Capacity and Schedule

1. Maximum Heat Input Rate:			mmBtu/hr
2. Maximum Incineration Rate:	lb/hr		tons/day
3. Maximum Process or Throughput Rate:	189 tons/hour		
4. Maximum Production Rate:	500,000 tons in any 12-month period		
5. Requested Maximum Operating Schedule:			
	hours/day		days/week
	weeks/year	2,500	hours/year
