PERMITTING AUTHORITY

Florida Department of Environmental Protection
Waste Management/Air Resources Program
Northwest District
160 W. Government Street, Suite 308
Pensacola, Florida 32502-5740

PROJECT

Air Permit No. 0390047-001-AC
Minor Source Air Construction Permit
Quincy Facility

This project is for the construction of an aerosol and nonaerosol product manufacturing facility. The proposed operation will consist of mixing various materials in tanks to prepare soaps, waxes, lubricants, fragrances, etc., and package these in bottles or cans. Air emissions have been estimated based on process knowledge to be 13 tons per year of VOC and less than 1 tons per year of HAP.

NOTICE AND PUBLICATION

The Department distributed a draft minor source air construction permit package on June 6, 2014. The applicant published the Public Notice in the Gadsden County Times on June 19, 2014. The Department received the proof of publication on June 20, 2014. No requests for administrative hearings or requests for extensions of time to file a petition for administrative hearing were received.

COMMENTS

No comments on the Draft Permit were received from the public or the applicant. A final review by the Department noted that there are no VOC or HAP limits stated in this permit. Therefore, specific condition A.2. was changed from:

> 2. Restricted Operation: The hours of operation are not limited (8760 hours per year), as long as the VOC and HAP emissions limits are not exceeded. [Rules 62-4.070(3) and 62-210.200(PTE), F.A.C.]

To:

> 2. Restricted Operation: The hours of operation are not limited (8760 hours per year). [Rules 62-4.070(3) and 62-210.200(PTE), F.A.C.]

CONCLUSION

The final action is to issue the permit with any minor changes, corrections and clarifications as described above.
