Appendix U-1, List of Unregulated Emission Units and/or Activities

BP Products North America, Inc.

PROPOSED Permit No.: 0310179-014-AV
Facility ID No.: 0310179

Unregulated Emissions Units and/or Activities: An emission unit (EU) which emits no "emissions-limited pollutant" and which is subject to no unit-specific work practice standard, though it may be subject to regulations applied on a facility-wide basis (e.g., unconfined emissions, odor, general opacity) or to regulations that require only that it be able to prove exemption from unit-specific emissions or work practice standards.

The below listed emissions units and/or activities are neither regulated emissions units nor "exempt" emission units.

EU ID No.	Brief Description of Emission Units and/or Activities
031	Petroleum Contact Water (PCW) Tanks. Tank No. 152 (19,700 Gallons) and Tank No. 153 (19,700 Gallons) [Terminal A] and Tank B (10,000 Gallons) [Terminal B]. The PCW is comprised of spills and stormwater at the truck loading racks, wastewater from internal tank cleanings and tank water draws from the gasoline and distillate storage tanks.
