This permit authorizes an additional paint booth to existing emissions unit (EU) 010. The new booth (already constructed) has high efficiency filters (99.83%) for control of particulate matter (PM). There is no VOC (volatile organic compounds) control. The new paint booth results in a potential increase of 4.3 tons per year of VOC based on a maximum rate of 1300 gallons of paint per year. There is a facility wide limit of 80 tons VOC per year. The facility is a natural minor for PM.
