---

Scott,

Attached are the pages from the application package with our request. I understand where the confusion came from the first comment. The comment was addressing the transfer point in the table that were not identified as fugitive as being enclosed. I think we are clear now. Please provide the correct with an Administration correction and make sure and correct in the Title V. Sorry for the confusion.

Sincerely,

Andrew D. Bass, P.E.

Andrew,

The applicant also indicates that "the transfer points are enclosed, therefore not emitting pollutants." Did the application say something else? Where in the permit application?

From looking at the permit application and the diagram it looked like they had been enclosed.

Obviously, tfr point "CH-009" is not enclosed – my error. I need to do an admin. permit correction on this.

Scott
