Lynn please log and assign to John Dawson. John I believe Al has already talked to you about this project.

Jeff this is a mod to the previous final PSD permit for the peaker unit project at FPL Ft Lauderdale. The main change is that the permit will now include a GHG BACT determination. Also the previous BACT determinations will be reaffirmed.

Question…do they need to submit another $7,500.00 fee?

Subject: FPL Lauderdale Peaker Project_FDEP 0110037-011-AC_Permit Revision_GHG PSD Application

Jeff/David: As previously discussed, please find attached a PSD Permit Revision for the FPL Lauderdale Peaker Project (FDEP Permit No. 0110037-0110-AC). This submittal also includes the GHG PSD Application. Since this submittal is a revision to an existing air construction/PSD permit, no PSD application fee is included per previous discussions with the Department. Please let us know if a fee may be needed.

The Siting Coordination Office is also being copied on this submittal since the Project is seeking approval for other environmental authorizations through a Petition for Modification. This application provides information related to Appendix 10.2.5 of that submittal.

I will be forwarding shortly the original signature pages of the application form. Please let us know if there are any technical questions as the review proceeds.

Regards, Ken
