I have been reviewing he final Title V permit that was just issued for North Broward and have noticed a couple of discrepancies I was hoping to discuss. I spoke with my regional office and they recommended I contact you directly. Unfortunately, I do not have your direct line phone number. If possible, could you give me a call at 954-971-8701, ext 216 at your earliest convenience.

Thanks.

Chuck Faller

We are able to fast track the Title V process by combining the DRAFT and PROPOSED actions for non-controversial projects where the EPA 45 day review (the PROPOSED permit) begins at the same time as the 30 day DRAFT period. (Remember that the AC was issued on a 14 day comment period.) The Title V permit comes off EPA review on February 4th. So you should see the final permit within a week from then (assuming normal conditions still exist).

Ed, I have one quick question. As you know, Wheelabrator North Broward received this final construction permit and PSD permit revision for the activated carbon system. My question is, and forgive my ignorance but, when do you think we will see the revised Title V permit (0112120-013-AV)? Does the EPA 45-day review period for the Title V permit revision begin with the issuance of

the construction permit/PSD revision? I was just wondering when I should expect to see the Title V final permit revision to complete the loop.
