Attachments: image002.png

Please find below minor comments related to the draft permit:

1. Please correct the e-mail address for R. Alexander Glenn to Alex.Glenn@Duke-Energy.com

2. The Proposed Project language (page 3 of 24) states that it "includes the permanent shutdown of CREC coal-fueled Units 1 and 2." This phrasing was revised elsewhere to state that Units 1 and 2 "will retire in conjunction with operation of CCCP." Please make this change here as well.

3. The Regulatory Classification section (page 4 of 24) states that the existing facility is subject to CAIR. According to EPA, CAIR will cease to exist on Jan 1, 2015, and be replaced by CSAPR. This description should be clarified, maybe to say that it will only be subject to CAIR as required by federal law.

4. Condition 7 (page 6 of 24) contains redundant language in subparts b. and c. Redundant language should be removed.

5. Condition 3 (page 9 of 24) needs a parenthetical that the inlet air-cooling system is optional.

6. In Condition 12.g., the phrase "two (2) hours in any 24-hour period" should be changed to "120 minutes in any 24-hour period" in order to maintain consistency with the other subparts of this condition.

Please let me know if you have any questions regarding these comments.

Thanks.
