Subject: Re: MODIFICATION APPLICATION NO. 0530021-052-AC, CEMEX BROOKSVILLE SOUTH CEMENT PLANT

Hi Max,

I am in the process of reviewing your recent modification application. I have a couple of questions:

1. I notice that the words lime and limestone are used interchangeably in the application and the appendices. I want to confirm that CEMEX will be injecting lime and not limestone?

It is just lime, not limestone

2. If CEMEX will be injecting lime, would you please clarify if they will be injecting hydrated lime or anhydrous lime?

The lime is only hydrated.
Thank you,
Pawan
