The purpose of this project is issue the facility's initial air operation permit which incorporates the terms and conditions of construction permit 1010518-001-AC, issued March 6, 2014. The facility has no significant modifications since the construction permit was issued and the applicant requested no changes in conditions or limits.

A site visit was performed on February 6, 2015 by the permitting engineer and Cindy Falandysz of SWD CAP. Reporting requirements were discussed and a brief walkthrough was performed. No issues pertaining to the air permit were discovered.

The final permit for this project is attached for your approval and signature, which authorizes continued operation of the facility originally permitted by after-the-fact construction permit 1010518-001-AC.

I recommend your approval of the attached final permit for this project.
