Subject: FPL Fort Myers Plant Unit 2

Al/David: As we discussed yesterday, please find attached a minor source air construction permit application for the FPL Fort Myers Plant Unit 2. This application reflects the addition of GE Frame 7FA.05 components along with the 7FA.04 components for which the Department issued Permit No. 0710002-020-AC. The application incorporates the Baseline Actual Emissions to Projected Actual Emissions comparison using forecast modeling conducted by FPL. I'll forward the original signatures next week. Please contact John Hampp or me if you have any questions. Regards, Ken
