I double checked with Thorley and he is ok with this approach. We will publish the notice now. Thanks Syed.

Jim,

This is just to confirm what we talked about concerning the Okeechobee Landfill Title V permit. If you can do the public notice now on the permit we issued, we will clean up the permit at a later time when it opens up for HAP issue. In order to make it a minor source of HAPs for future MACTs, there will have to be some enforceable conditions in the permit which will provide reasonable assurance that the facility will stay a minor source of HAP.

Please call me if you have any questions.

Thanks,
Syed
