Attachments: Relocation Notice fax_list.pdf

Felicia,

Please accept this email as follow-up to our telephone conversation, yesterday, January 19, 2012.

As we discussed, I have corrected the address for your Guymann Construction Crusher, Facility Id No. 7775426, which recently move to our district. The address now reflects the location as 2347 SW Highway 17, Arcadia, FL. Please remember that when the unit moves from this location you will need to send a relocation notification for to the appropriate District or Local program indicating where the unit will be going, even if it is just moving back to your Fort Myers storage yard. Attached to this email is a PDF version of the Relocation Notification fax list you will need to provide copies of your relocation notification forms to the appropriate District or Local program. Please let me know if you are unable to access the information.

Additionally, I wanted to document some of the other items we discussed and provide links to the web page for your facility type in case you need it. The web page for Non-metallic mineral processing facility information is: Air General Permits - Nonmetallic Mineral Processing Plants - Division of Air Resource Management - FDEP

On this web page you will find all the information you need to assist you in staying in compliance with your General Permit Entitlement(permit).

The Nonmetallic Mineral Processing Plants Workbook explains the requirements of your permit in plain language.

The Nonmetallic Mineral Processing Plant Air General Permit Example Worksheet is an online form you can use to provided the Department with all the information needed to renew your permits. Remember that your renewal registration fee and forms need to be sent to one of the addresses provided on the worksheet at least 30 days prior to when your current permit expires in September of this year.

- The Facility Relocation Notification Form - PDF Version in an online form you

can use to populate the relocation notification form electronically. Your permit requires Guymann Construction to "notify the Department at least one business day prior to changing location". This can be done by phone, fax, email, or written communication and then transmit a Facility Relocation Notification Form to the Department no later than (5) days following location change.
If you have any questions about the information above or the other items we discussed, please don't hesitate to contact me.
Thank you for your time,

Wendy D. Akins
Environmental Specialist
Southwest District Air Program
