Permit No. 0090047-004-AC (Project No. 0090047-010)
Electronics Mfg. Facility (Palm Bay)

Dear Mr. Tydor:

In response to your operating permit application received May 22, 2009, the referenced permit is changed as follows:

Permit Page 1 - **Add**

The purpose of the construction permit revision is to reduce the permitted facility emission limits of hazardous air pollutants (HAPs) from less than 10 tons per year of any individual HAP and less than 23 tons per year of combined HAPs to less than 7 tons per year of any individual HAP and less than 14 tons per year of combined HAPs. The permit also allows the replacement of a scrubber at building 12 and removes the annual operating report requirement.

Permit Page 5, Specific Condition 10

From: The maximum Harris Government Communications Systems Division (HGCSD) volatile organic compound (VOC) emissions rate is limited to less than 25.0 tons per consecutive twelve months, combined HAP emissions are limited to less than 25.0 tons per consecutive twelve months and any single HAP emission is limited to less than 10.0 tons per consecutive twelve months.

To: Total facility-wide emissions of combined volatile organic compound (VOC) emissions are limited to less than 23.0 tons per any consecutive 12-month period, hazardous air pollutants (HAPs) emissions are limited to less than 14.0 tons per any consecutive 12-month period and any single HAP emission is limited to less than 7.0 tons per any consecutive 12-month period.
[Rule 62-210.200, (PTE), F.A.C. and permit 0090047-010-AC, as requested by the applicant]

Permit Page 6, Specific Condition 16 - **Delete**

All other descriptions and conditions remain the same. This letter must be attached to the permit and becomes a part of the permit.

Executed in Orlando, Florida.
