Hi Tammy,

Seems reasonable and appropriate. I've forwarded your message to my supervisor and others for consideration. I will follow up with you tomorrow.

Thanks!

Subject: G-P Palatka Mill, Project No. 1070005-081-AC

Hi Ron,

Syed returned to work today and I was able to speak to him about the testing requirements for the proposed drum filtering system. Testing of the equipment would consist of one of the two scenarios:

1. Initial VE test (5% opacity limit) and VE test prior to TV renewal; or
2. Initial VE test (5% opacity limit) and Work Practice Standards submitted and kept on file.

Let me know your opinion. If you have any question or concerns please give me a call or email.

Thank you,

Tammy T. McWade
