Appendix U-1. List of Unregulated Emission Units and/or Activities

These engines are not subject to any unit-specific emissions standards, monitoring provisions or testing requirements, and are therefore considered unregulated emission units.

E.U. ID No.	Brief Description
001*	Engine 1701 is a 2,000 bhp Cooper-Bessemer Model LS-8-SG 4 stroke lean burn (4SLB) reciprocating internal combustion engine installed in 1966.
002*	Engine 1702 is a 2,000 bhp Cooper-Bessemer Model LS-8-SG 4 stroke lean burn (4SLB) reciprocating internal combustion engine installed in 1966.
003*	Engine 1703 is a 2,000 bhp Cooper-Bessemer Model LS-8-SG 4 stroke lean burn (4SLB) reciprocating internal combustion engine installed in 1966.

Note

***** These engines meet the 40 CFR 63, Subpart ZZZZ-National Emissions Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines definition of “existing units”. As such, there are no unit specific applicable requirements that must be met pursuant to this rule for these engines at this time (See 40 CFR Part 63 Subpart ZZZZ, Section 63.6590(b)(3)). These engines are also listed as existing engines in Appendix ICE.
