Lynn: here is another one.

"Just call it Hines #2 Steam Turbine Commissioning".

John.

Let Lynn know if you will do this one or you can ship back to me if you prefer.

(Would be a fun one though).

Thanks.

Al.

Subject: Hines Energy COmplex - PB2 Replacement Steam Turbine "Commissioning"

Good afternoon David –

Attached is a request for a permit determination for the process of "commissioning" the Hines Energy Complex's Power Block 2 (PB2) replacement steam turbine. Recall the original PB2 Siemens steam turbine sustained a catastrophic failure in July 2014 and the replacement steam turbine is a Siemens "like/kind" replacement.

Attached to the request for a permit determination is a narrative of the proposed "commissioning" process, a signed/seal Professional Engineer's Signature page and a signed Responsible Official Signature page.

If you have any questions or require any clarifications regarding the attached document or the commissioning process itself, please do not hesitate to contact me.

Best regards,

Chris Bradley
