Lynn:

Pawan will see you about opening up another project number under the same application.

We are handling the application in two parts.

The first is the one you send out today (Letter of Authorization).

The second will depend on some of the results obtained from the part we authorized today.

So maybe just add a project "037-AC" to revise "Visible Emissions Monitoring".

Use original application submittal date. We'll send an RAI out on it this Friday.

Thanks.

Al.

Subject: Suwannee Cement Plant

Lynn please clerk and post the attached Letter of Authorization that allows Suwannee Cement to replace the COMS on the kin and cooler stack with PM- CPMS.

Thanks
