FINAL DETERMINATION

PERMITTEE

C.D. McIntosh, Jr. Power Plant
City of Lakeland, Lakeland Electric
501 East Lemon Street
Lakeland, Florida 33801-5079

PERMITTING AUTHORITY

Florida Department of Environmental Protection (Department)
Division of Air Resource Management
Office of Permitting and Compliance
2600 Blair Stone Road, MS #5505
Tallahassee, Florida 32399-2400

PROJECT

Permit No. 1050004-034-AC
Application for Minor Source Air Construction Permit
NO_X Emissions Limit for Unit 1 Project

PUBLIC NOTICE

The Department distributed a draft air construction permit package on April 2, 2014. The applicant published the Public Notice in the Lakeland Ledger in Polk County, Florida on April 9, 2014. The Department received the proof of publication on April 9, 2014.

No requests for an administrative hearing or requests for an extension of time in which to file a petition for an administrative hearing were received by the Agency Clerk in the Department's Office of General Counsel.

COMMENTS

No comments on the permit were received from the applicant, public or the U.S. EPA Region 4 Office during the 14-day public comment period.

Department Corrections

The Department made several corrections/clarifications in the final permit. All changes are emphasized with yellow highlight in this document only. Additions to the permit are indicated below by double underline. Deletions from the permit are indicated below by ~~strike through~~.

1. Page 6 of the Permit - Subsection II. - Specific Condition 2.8. No expiration date was placed in this AC permit as no construction is necessary. The Department has boilerplate permit language in the AC permit for when the Title V permit revision application is required to be submitted. The permit can be clarified to read that the Title V permit revision application submittal requirement is based on the U.S. EPA approval date of the amendment to Florida's Regional Haze State Implementation Plan (SIP). Specific Condition 2.8. is clarified to read as follows:

> "8. Title V Permit: This permit authorizes specific modifications and/or new construction on the affected emissions units as well as initial operation to determine compliance with conditions of this permit. A Title V operation permit is required for regular operation of the permitted emissions unit. The permittee shall apply for a Title V operation permit at least 90 days prior to expiration of this permit, but no later than 180 days after completing the required work and commencing operation.
>
> The permittee shall apply for the Title V permit revision within 180 days of U.S. EPA's approval of the amendment to Florida's Regional Haze State Implementation Plan (SIP).
>
> …"

CONCLUSION

The final action of the Department is to issue the permit with the administrative corrections and/or clarifications as noted above.
