Title V Air Operation Permit Renewal
Final Permit Project No.: 1070030-009-AV

This Title V Air Operation Permit Renewal is issued under the provisions of Chapter 403, Florida Statutes (F.S.), and Florida Administrative Code (F.A.C.) Chapters 62-4, 62-210 and 62-213. The above named permittee is hereby authorized to operate the facility shown on the application and approved drawing(s), plans, and other documents, attached hereto or on file with the permitting authority, in accordance with the terms and conditions of this permit.

The subject of this permit is for the renewal of the Title V Air Operation Permit.

This facility consists of two direct-fired lumber kilns and three cyclones for removing wood waste from the wood working operations.

Each kiln consists of a carbonaceous (wood waste) burner with a maximum design heat input of 26 MMBtu per hour. USNR manufactures the East direct-fired kiln burner and the West direct-fired kiln burner is by Energy Systems. Irvington Moore manufactures the kilns. Each kiln is used to dry green lumber. The emissions from each dry kiln are released through 12 vents. There is an abort stack to bypass the kiln to vent the heat between kiln charges. The maximum throughput rate for each kiln is 135 thousand board feet (mbf) per batch. The maximum throughput rate for both kilns combined is approximately 119,000 mbf per year.

Also included in this permit are miscellaneous unregulated/insignificant emissions units and/or activities. CAM does not apply.

Based on the Title V Air Operation Permit Renewal application received November 15, 2007, this facility is a major source of hazardous air pollutants (HAPs).
