---

Tammy,

Thanks again for providing the updated preliminary draft permit for our review today. As we discussed earlier this week, you incorporated all "DEP acceptable" requested changes provided by West Fraser. Thank you for the agency's review and incorporated of these requested changes for the draft permit.

We had one follow-up question on the following added reporting requirement for the new kilns.

- Section III.17 (EU009, EU010) – mislabeled as "Condition 10" in the current provided preliminary draft permit, is an added actual emissions report (annual) for the new kilns similar to the requirement that EU006, EU007, and EU011 are subject to regarding PM/PM10/PM2.5 emissions estimated on annual basis. This reporting requirement was not included in the initial preliminary draft permit so we wanted to follow-up to see why DEP needs PM/PM10/PM2.5 emissions included in the actual emissions report (for the new kilns as well) if no PM/PM10/PM2.5 emissions compliance testing is required to be compliance, and the potential emissions have already been provided in the permit application based on maximum permitted lumber production (170 MMBF/yr) and continuous operation (8,760 hr/yr).

Best Regards,

……

Hi Brad,

Please do a quick review of the preliminary draft. The draft permit package will be going out tomorrow.

Thank you,

Tammy
