Mr. Brian P. Schreiber, Secretary
Anderson Columbia Co., Inc.
Post Office Box 1829
Lake City, Florida 32056

Dear Mr. Schreiber:

This is to acknowledge receipt of your application for an air operation permit, DEP file number 7775064-007-AO, for Plant #16 at the Anderson Columbia Co., Inc., site in Marianna, Florida in Jackson County. This letter constitutes notice that a permit will be required for your project pursuant to Chapter 403, Florida Statutes.

Your application for permit is incomplete. Please provide the information listed below within 90 days of receipt of this letter. Evaluation of your proposed project will be delayed until all requested information has been received. References made below to "Application" refer to DEP Form No. 62-210.900(3), effective February 11, 1999 and its instructions.

1. Page 5 of the application form lists three emissions units in the Scope of Application. However, the emissions unit numbers and descriptions do not match the emissions unit numbers and descriptions in the construction permit. Please amend the Scope of Application to correspond to the emissions unit(s) permitted by Permit 7775064-006-AC (EU003—300 TPH Hot Mix Asphalt Plant With Baghouse). ["List all emissions units covered by this permit application, each of which must be addressed in a separate Emissions Unit Information Section (Section III of the Application for Air Permit)", DEP Form No. 62-210.900(3) – Instructions, Page 8]

2. The information pertaining to the asphalt cement heater is not consistent with the Process Flow Diagram in the construction permit application. In the construction permit application, the assumption is made that 50% of the SO_2 from the asphalt cement heater is incorporated in the final product. However, the Process Flow Diagram indicates that the asphalt cement heater is a separate emission point. If this is the case, the exemption cited [62-210.300(3)(b)1.b.(IV)]

does not apply. Please either correct the Process Flow Diagram to show the emissions from the heater routed through the dryer or present the corrected Emissions Unit Pollutant Detail Information for EU004-- 1.2 MMBtu Asphalt Cement Heater. [Process Flow Diagrams(s) – "Provide a general process flow diagram or set of diagrams showing any proposed new or modified emissions units and all existing emissions units at the facility. Indicate the operating rate of each emissions unit, and identify the pathways by which raw materials and products flow from unit to unit." DEP Form No. 62-210.900(3) – Instructions, Page 15 and Section III. Emissions Unit Information, DEP Form No. 62-210.900(3) – Instructions, Page 16]

3. To date, the Department has received only pages 1-6 of the application. Please submit the rest of the completed application, pages 7-17 and all required supplemental information. [DEP Form 62-210.900(3) and associated instructions].

Professional Engineer (P.E.) Certification Statement**:** Rule 62-4.050(3), Florida Administrative Code (F.A.C.), requires that all applications for a Department permit must be certified by a professional engineer registered in the State of Florida. This requirement also applies to responses to Department requests for additional information of an engineering nature. As a result, at a minimum your response to the above should be certified by a professional engineer registered in the State of Florida. Please complete and submit a new P.E. certification statement page from the Non-Title V application form, DEP Form No. 62-210.900(3) (enclosed).

When referring to this project, please use the file number indicated above. The Department must receive a response from you within 90 days of receipt of this letter, unless you (the applicant) request additional time under Rule 62-4.055(1), F.A.C.

If you have any questions, please contact Teresa Knepper at 850/595-0670 or teresa.knepper@dep.state.fl.us.

Sincerely,

/s/

Rick Bradburn
Air Program Administrator

4. Professional Engineer Statement:

I, the undersigned, hereby certify, except as particularly noted herein, that:*

(1) To the best of my knowledge, there is reasonable assurance that the air pollutant emissions unit(s) and the air pollution control equipment described in this Application for Air Permit, when properly operated and maintained, will comply with all applicable standards for control of air pollutant emissions found in the Florida Statutes and rules of the Department of Environmental Protection; and

(2) To the best of my knowledge, any emission estimates reported or relied on in this application are true, accurate, and complete and are either based upon reasonable techniques available for calculating emissions or, for emission estimates of hazardous air pollutants not regulated for an emissions unit addressed in this application, based solely upon the materials, information and calculations submitted with this application.

If the purpose of this application is to obtain an air construction permit for one or more proposed new or modified emissions units (check here [ ], if so), I further certify that the engineering features of each such emissions unit described in this application have been designed or examined by me or individuals under my direct supervision and found to be in conformity with sound engineering principles applicable to the control of emissions of the air pollutants characterized in this application.

If the purpose of this application is to obtain an initial air operation permit or operation permit revision for one or more newly constructed or modified emissions units (check here [ ], if so), I further certify that, with the exception of any changes detailed as part of this application, each such emissions unit has been constructed or modified in substantial accordance with the information given in the corresponding application for air construction permit and with all provisions contained in such permit.
