Re: Concurrent Air Construction/Title V Operation Permit Nos. 0570439-021-AC/0570439-022-AV
Lazzara Yachts, Inc.
Title V Air Operation Permit Renewal/Revision for Fiberglass Boat Manufacturing

Dear Mr. Lazzara:

Enclosed is the DRAFT/PROPOSED permit package to renew and revise the existing Title V permit. The permitted facility is located in Hillsborough County at 5250 West Tyson Avenue, Tampa, Florida. The permit package includes the following documents:

- The Technical Evaluation and Statement of Basis, which summarizes the facility, the process equipment, air pollution control equipment, and the primary rule applicability.
- The DRAFT Air Construction permit, which includes the specific conditions that were affected based on the permit application received on December 20, 2013.
- The DRAFT/PROPOSED Title V air operation permit renewal/revision, which incorporates the conditions of the DRAFT Air Construction permit.
- The Written Notice of Intent to Issue Air Permits, which provides important information regarding: the Permitting Authority's intent to issue air permits for the proposed project; the requirements for publishing a Public Notice of the Permitting Authority's intent to issue air permits; the procedures for submitting comments on the DRAFT/PROPOSED permits; the process for filing a petition for an administrative hearing; and the availability of mediation.
- The Public Notice of Intent to Issue Air Permits, which is the actual notice that you must have published in the legal advertisement section of a newspaper of general circulation in the area affected by this project. The Public Notice of Intent to Issue Air Permits must be published as soon as possible and the proof of publication must be provided to the EPCHC within seven days of the date of publication. Because this Title V permit is being processed as a combined DRAFT/PROPOSED permit in order to reduce processing time, a duplicate copy of the proof of publication must also be transmitted by electronic mail within seven days of the date of publication to Ms. Ana Oquendo (Oquendo.Ana@epa.gov) and Natasha Hazziez (Hazziez.Natasha@epa.gov) at EPA Region 4.

If you have any questions, please contact the Project Engineer, Stephen Hathaway, by telephone at (813)627-2600 x 1268 or by e-mail at hathaways@epchc.org.

Sincerely,

Richard D. Garrity, Ph.D.
Executive Director

RDG/SRH/srh

by Rule 28-106.301, F.A.C.

Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the Permitting Authority's final action may be different from the position taken by it in this Written Notice of Intent to Issue Air Permits. Persons whose substantial interests will be affected by any such final decision of the Permitting Authority on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above.

Mediation: Mediation is not available in this proceeding.

EPA Review: EPA has agreed to treat the DRAFT/PROPOSED Title V air operation permit as a PROPOSED Title V air operation permit and to perform its 45-day review provided by the law and regulations concurrently with the public comment period, provided that the applicant also transmits an electronic copy of the required proof of publication directly to EPA at the following email addresses: oquendo.ana@epamail.epa.gov and Hazziez.Natasha@epa.gov. Although EPA's 45-day review period will be performed concurrently with the public comment period, the deadline for submitting a citizen petition to object to the EPA Administrator will be determined as if EPA's 45-day review period is performed after the public comment period has ended. The final Title V air operation permit will be issued after the conclusion of the 45-day EPA review period so long as no adverse comments are received that result in a different decision or significant change of terms or conditions. The status regarding EPA's 45–day review of this project and the deadline for submitting a citizen petition can be found at the following website address: http://www.epa.gov/region4/air/permits/Florida.htm.

Objections: Finally, pursuant to 42 United States Code (U.S.C.) Section 7661d(b)(2), any person may petition the Administrator of the EPA within 60 days of the expiration of the Administrator's 45-day review period as established at 42 U.S.C. Section 7661d(b)(1), to object to the issuance of any Title V air operation permit. Any petition shall be based only on objections to the Permit that were raised with reasonable specificity during the 30-day public comment period provided in the Public Notice, unless the petitioner demonstrates to the Administrator of the EPA that it was impracticable to raise such objections within the comment period or unless the grounds for such objection arose after the comment period. Filing of a petition with the Administrator of the EPA does not stay the effective date of any permit properly issued pursuant to the provisions of Chapter 62-213, F.A.C. Petitions filed with the Administrator of EPA must meet the requirements of 42 U.S.C. Section 7661d(b)(2) and must be filed with the Administrator of the EPA at: U.S. EPA, 401 M Street, S.W., Washington, D.C. 20460. For more information regarding EPA review and objections, visit EPA's Region 4 web site at http://www.epa.gov/region4/air/permits/Florida.htm.

Executed in Tampa, Florida.

Richard D. Garrity, Ph.D.
Executive Director

CERTIFICATE OF SERVICE

The undersigned duly designated deputy agency clerk hereby certifies that this Written Notice of Intent to Issue the DRAFT Air Construction Permit and the DRAFT/PROPOSED Title V Air Operation Permit (including the Public Notice, the Statement of Basis, and the DRAFT/PROPOSED Permits), or a link to these documents available electronically on a publicly accessible server, was sent by certified mail or electronic mail with received receipt requested before the close of business on 1/24/2014 to the persons listed below.
