Memorandum

Florida Department of
Environmental Protection

TO: Trina Vielhauer

FROM: Al Linero

DATE: July 18, 2003

SUBJECT: Draft Permit Revision for Nailite International, Inc.
Permit No. 0250407-007-AC (PSD-FL-289B)

Attached for approval and signature is a draft permit modification that revises certain conditions in Nailite's existing air construction permit

Nailite requested: authorization to further modify Lines 1 and 2 in order to increase VOC capture efficiency of the system; indefinite future operation of Line 1; and to use results from emissions testing (to be conducted) subsequent to the construction of additional line modifications to establish capture and destruction efficiency requirements.

The further modifications of Lines 1 and 2 are already authorized by the existing construction permit and only an extension is required. The information allowing the Department to make a decision on the indefinite operation of Line 1 will not be available until April 2004. Therefore I recommend extending the construction permit until June 30, 2004 and authorizing operation of Line 1 only through that date.

I incorporated the Compliance Plan that was included by Miami-Dade DERM in the Proposed Title V Operation Permit that is presently under review by EPA. It addresses the specific measures and milestones to allow Nailite to comply with the design specifications of the construction permit. At the completion of the Compliance Plan, they will submit another construction permit application to set final collection and destruction efficiency. At that time, they will be in a better position to request indefinite operation of Line 1 and we will have a better basis for making a decision on the matter.

I recommend your approval. Today (July 18) is Day 85.

CERTIFIED MAIL - RETURN RECEIPT REQUESTED

Mr. John Perry
Vice President of Operations
Nailite International, Inc.
1111 NW 165th Street
Miami, Florida 33169

Re: DEP File No. 0250407-007-AC (PSD-FL-289B)
Construction Permit Modification - New Panel Line and Relocation of Existing Panel Line

Dear Mr. Perry:

Enclosed is one copy of the Department's Intent to Issue an air construction permit modification to Nailite for the installation of a new panel line and an existing panel line at its new location at 1111 NW 165th Street, Miami, Dade County. The modification will extend the expiration date of the present permit and the shutdown date for the old line. The draft air construction permit modification and the Public Notice of Intent to Issue Modified Air Construction Permit are attached.

The Public Notice must be published one time only, as soon as possible, in the legal advertisement section of a newspaper of general circulation in the area affected, pursuant to the requirements Chapter 50, Florida Statutes. Proof of publication, i.e., newspaper affidavit, must be provided to the Department's Bureau of Air Regulation office within seven days of publication. Failure to publish the notice and provide proof of publication may result in the denial of the permit.

Please submit any written comments you wish to have considered concerning the Department's proposed action to A. A. Linero, P.E., Administrator, New Source Review Section at the above letterhead address. If you have any other questions, please contact Mr. Linero at 850/921-9523.

Sincerely,

Trina Vielhauer

Trina Vielhauer, Chief
Bureau of Air Regulation

TLV/al

Enclosures

(implemented by) the rule identified in (c) above; (e) The type of action requested; (f) The specific facts that would justify a variance or waiver for the petitioner; (g) The reason why the variance or waiver would serve the purposes of the underlying statute (implemented by the rule); and (h) A statement whether the variance or waiver is permanent or temporary and, if temporary, a statement of the dates showing the duration of the variance or waiver requested.

The Department will grant a variance or waiver when the petition demonstrates both that the application of the rule would create a substantial hardship or violate principles of fairness, as each of those terms is defined in Section 120.542(2) F.S., and that the purpose of the underlying statute will be or has been achieved by other means by the petitioner.

Persons subject to regulation pursuant to any federally delegated or approved air program should be aware that Florida is specifically not authorized to issue variances or waivers from any requirements of any such federally delegated or approved program. The requirements of the program remain fully enforceable by the Administrator of the EPA and by any person under the Clean Air Act unless and until the Administrator separately approves any variance or waiver in accordance with the procedures of the federal program.

Executed in Tallahassee, Florida.

INTENT TO ISSUE MODIFIED AIR CONSTRUCTION PERMIT

The Department of Environmental Protection (Department) gives notice of its intent to issue an air construction permit modification (copy of draft permit modification) for to a previously approved permit for the reasons stated below.

The applicant, Nailite International, Inc., applied on April 21 (complete April 25), 2003 to the Department for modification of the previously issued air construction permit that provided for installation of a new paint line at and relocation of an existing line to 1111 NW 165th Street, Miami, Dade County. Nailite requested: authorization to further modify Lines 1 and 2 in order to increase VOC capture efficiency of the system; indefinite future operation of Line 1; and to use results from emissions testing (to be conducted) subsequent to the construction of additional line modifications to establish capture and destruction efficiency requirements.

The Department has permitting jurisdiction under the provisions of Chapter 403, Florida Statutes (F.S.), and Florida Administrative Code (F.A.C.) Chapters 62-4, 62-210, and 62-212. The above actions are not exempt from permitting procedures. The Department has determined that an air construction permit modification is required.

The further modifications of Lines 1 and 2 are already authorized by the existing construction permit and only an extension is required. The information allowing the Department to make a decision on the indefinite operation of Line 1 will not be available until April 2004. Therefore the construction permit will be extended until June 30, 2004 and operation of Line 1 will be authorized through that date. The Department will consider indefinite operation of Line 1 based on the described emission testing program. The decision will also be publicly noticed.

The Department intends to issue this air construction permit modification based on the belief that reasonable assurances have been provided to indicate that operation of these emission units will not adversely impact air quality, and the emission units will comply with all appropriate provisions of Chapters 62-4, 62-204, 62-210, 62-212, 62-296, and 62-297, F.A.C.

Pursuant to Section 403.815, F.S., and Rule 62-110.106(7)(a)1., F.A.C., you (the applicant) are required to publish at your own expense the enclosed Public Notice of Intent to Issue Air Construction Permit Modification. The notice shall be published one time only in the legal advertisement section of a newspaper of general circulation in the area affected. Rule 62-110.106(7)(b), F.A.C., requires that the applicant cause the notice to be published as soon as possible after notification by the Department of its intended action. For the purpose of these rules, "publication in a newspaper of general circulation in the area affected" means publication in a newspaper meeting the requirements of Sections 50.011 and 50.031, F.S., in the county where the activity is to take place. If you are uncertain that a newspaper meets these requirements, please contact the Department at the address or telephone number listed below. The applicant shall provide proof of publication to the Department's Bureau of Air Regulation, at 2600 Blair Stone Road, Mail Station #5505, Tallahassee, Florida 32399-2400 (Telephone: 850/488-0114; Fax 850/ 922-6979). You must provide proof of publication within seven days of publication, pursuant to Rule 62-110.106(5), F.A.C. No permitting action for which published notice is required shall be granted until proof of publication of notice is made by furnishing a uniform affidavit in substantially the form prescribed in section 50.051, F.S. to the office of the Department issuing the permit. Failure to publish the notice and provide proof of publication may result in the denial of the permit pursuant to Rules 62-110.106(9) & (11), F.A.C.

The Department will issue the final permit modification with the attached conditions unless a response received in accordance with the following procedures results in a different decision or significant change of terms or conditions.

The Department will accept written comments concerning the proposed permit modification issuance action for a period of fourteen (14) days from the date of publication of the Public Notice. Written comments and requests for public meetings should be provided to the Department's Bureau of Air Regulation at 2600 Blair Stone Road, Mail

Station #5505, Tallahassee, FL 32399-2400. Any written comments filed shall be made available for public inspection. If written comments received result in a significant change in the proposed agency action, the Department shall revise the proposed permit and require, if applicable, another Public Notice.

The Department will issue the permit modification with the attached conditions unless a timely petition for an administrative hearing is filed pursuant to sections 120.569 and 120.57 F.S., before the deadline for filing a petition. The procedures for petitioning for a hearing are set forth below.

A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative proceeding (hearing) under sections 120.569 and 120.57 of the Florida Statutes. The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, Florida, 32399-3000. Petitions filed by the permit applicant or any of the parties listed below must be filed within fourteen days of receipt of this notice of intent. Petitions filed by any persons other than those entitled to written notice under section 120.60(3) of the Florida Statutes must be filed within fourteen days of publication of the public notice or within fourteen days of receipt of this notice of intent, whichever occurs first. Under section 120.60(3), however, any person who asked the Department for notice of agency action may file a petition within fourteen days of receipt of that notice, regardless of the date of publication. A petitioner shall mail a copy of the petition to the applicant at the address indicated above at the time of filing. The failure of any person to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under sections 120.569 and 120.57 F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention will be only at the approval of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205 of the Florida Administrative Code.

A petition that disputes the material facts on which the Department's action is based must contain the following information: (a) The name and address of each agency affected and each agency's file or identification number, if known; (b) The name, address, and telephone number of the petitioner, the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination; (c) A statement of how and when petitioner received notice of the agency action or proposed action; (d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate; (e) A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action; (f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action; and (g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency's proposed action.

A petition that does not dispute the material facts upon which the Department's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301.

Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the Department's final action may be different from the position taken by it in this notice. Persons whose substantial interests will be affected by any such final decision of the Department on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above. Mediation is not available in this proceeding.

In addition to the above, a person subject to regulation has a right to apply for a variance from or waiver of the requirements of particular rules, on certain conditions, under Section 120.542 F.S. The relief provided by this state statute applies only to state rules, not statutes, and not to any federal regulatory requirements. Applying for a variance or waiver does not substitute or extend the time for filing a petition for an administrative hearing or exercising any other right that a person may have in relation to the action proposed in this notice of intent.

The application for a variance or waiver is made by filing a petition with the Office of General Counsel of the Department, 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, Florida 32399-3000. The petition must specify the following information: (a) The name, address, and telephone number of the petitioner; (b) The name, address, and telephone number of the attorney or qualified representative of the petitioner, if any; (c) Each rule or portion of a rule from which a variance or waiver is requested; (d) The citation to the statute underlying

(implemented by) the rule identified in (c) above; (e) The type of action requested; (f) The specific facts that would justify a variance or waiver for the petitioner; (g) The reason why the variance or waiver would serve the purposes of the underlying statute (implemented by the rule); and (h) A statement whether the variance or waiver is permanent or temporary and, if temporary, a statement of the dates showing the duration of the variance or waiver requested.

The Department will grant a variance or waiver when the petition demonstrates both that the application of the rule would create a substantial hardship or violate principles of fairness, as each of those terms is defined in Section 120.542(2) F.S., and that the purpose of the underlying statute will be or has been achieved by other means by the petitioner.

Persons subject to regulation pursuant to any federally delegated or approved air program should be aware that Florida is specifically not authorized to issue variances or waivers from any requirements of any such federally delegated or approved program. The requirements of the program remain fully enforceable by the Administrator of the EPA and by any person under the Clean Air Act unless and until the Administrator separately approves any variance or waiver in accordance with the procedures of the federal program.

Executed in Tallahassee, Florida.

PUBLIC NOTICE OF INTENT TO ISSUE AIR CONSTRUCTION PERMIT MODIFICATION

STATE OF FLORIDA
DEPARTMENT OF ENVIRONMENTAL PROTECTION
DEP File No. 0250407-007-AC

Nailite International, Inc.
Miami-Dade County

The Department of Environmental Protection (Department) gives notice of its intent to issue an air construction permit modification for the previously-approved installation of a new paint line at and relocation of an existing line to Nailite's new location. A review pursuant to the Rules for the Prevention of Significant Deterioration (PSD) and a determination of Best Available Control Technology (BACT) pursuant to Rule 62-212.400, F.A.C. was previously conducted. A determination of Maximum Achievable Control Technology (MACT) pursuant to 40 CFR 63, Subpart B and Rule 62-204.800 was previously conducted. The applicant's new location and mailing address is Nailite International, Inc., 1111 NW 165th Street, Miami, Florida 33169.

Nailite manufactures molded plastic panels from polypropylene pellets and coats them in a series of paint booths. The previously issued permit specified the capture of volatile organic compounds (VOC) from the Line 2 and their destruction in a Regenerative Thermal Oxidizer (RTO). Relocation and operation of the previously uncontrolled Line 1 was authorized until December 31, 2003 provided it was connected to the new RTO.

Nailite requested: authorization to further modify Lines 1 and 2 in order to increase VOC capture efficiency of the system; indefinite future operation of Line 1; and to use results from emissions testing (to be conducted) subsequent to the construction of additional line modifications to establish capture and destruction efficiency requirements.

The further modifications of Lines 1 and 2 are already authorized by the existing construction permit and only an extension is required. The information allowing the Department to make a decision on the indefinite operation of Line 1 will not be available until April 2004. Therefore the construction permit will be extended until June 30, 2004 and operation of Line 1 will be authorized through that date. The Department will consider indefinite operation of Line 1 based on the described emission testing program. The decision will also be publicly noticed.

The Department will accept written comments concerning the proposed permit issuance action for a period of fourteen (14) days from the date of publication of this Public Notice of Intent to Issue Modified Air Construction Permit. Written comments should be provided to the Department's Bureau of Air Regulation at 2600 Blair Stone Road, Mail Station #5505, Tallahassee, FL 32399-2400. Any written comments filed shall be made available for public inspection. If written comments received result in a significant change in the proposed agency action, the Department shall revise the proposed permit modification and require, if applicable, another Public Notice.

The Department will issue the permit modification with the attached conditions unless a timely petition for an administrative hearing is filed pursuant to sections 120.569 and 120.57 F.S., before the deadline for filing a petition. The procedures for petitioning for a hearing are set forth below. Mediation is not available in this proceeding.

A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative proceeding (hearing) under sections 120.569 and 120.57 of the Florida Statutes. The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, Florida, 32399-3000. Petitions filed by the permit applicant or any of the parties listed below must be

NOTICE TO BE PUBLISHED IN THE NEWSPAPER

Month Day, 2003 **DRAFT**

CERTIFIED MAIL - RETURN RECEIPT REQUESTED

Mr. John Perry
Vice President of Operations
Nailite International, Inc.
1111 NW 165th Street
Miami, Florida 33169

Re: Request to Re-Issue and Modify Construction Permit
DEP File Nos. 0250407-005-AC and 0250407-007-AC (PSD-FL-289B)

Dear Mr. Perry:

The Department received Nailite's request on April 21 (complete April 25) requesting re-issuance of and modification of the air permit to construct Line 2 at and relocate Line 1 to the new building at 1111 NW 165th Street in Miami.

Specifically, Nailite requested: authorization to further modify Lines 1 and 2 in order to increase VOC capture efficiency of the system; indefinite future operation of Line 1; and to use results from emissions testing (to be conducted) subsequent to the construction of additional line modifications to establish capture and destruction efficiency.

The further modifications of Lines 1 and 2 are already authorized by the existing construction permit and only an extension is required. The information allowing the Department to make a decision on the indefinite operation of Line 1 will not be available until April 2004. The Department will consider indefinite operation of Line 1 based on the described emission testing program.

The expiration date of Air Construction Permit Number 0250407-005-AC is hereby is hereby extended from December 31, 2003 to June 30, 2004. Specific Condition 2 is hereby modified as follows:

The maximum amount of coating applied shall be 300,000 gallons per line per year. The No. 1 Spray Coating Line (EU-001) shall be allowed to operate through ~~December 31, 2003~~ June 30, 2004, and not thereafter. EU-001 shall only operate while appropriately connected to the Regenerative Thermal Oxidizer (RTO) so that its emissions are controlled along with those from Emissions Unit 004. Total hourly and annual emissions of volatile organic compounds (VOC) and hazardous air pollutants (HAPs) from the RTO shall be established within 45 days of receipt of the emission test results required in Specific Conditions Nos. 3 and 4 below.
[Rules 62-4.070(3), 62-204.800(10)(d)2., and 62-210.200 (PTE), F.A.C., and MACT

The following Compliance Plan is hereby incorporated into and made a part of this permit.

Compliance Plan

Background:

The owner or operator was unable to demonstrate compliance with the terms and conditions of their air construction permit, No. 0250407-005-AC/PSD-FL-289A, related to the VOC (volatile organic compounds) capture efficiency requirements of a Regenerative Thermal Oxidizer (RTO) system. Specifically, initial testing results indicated collection efficiencies from Paint Lines 1 and 2 in the range of 80 to 85 percent, which are below the design values of 95 percent indicated in the construction permit. The Florida Department of Environmental Protection (FDEP) has determined that further construction, measures and testing are required prior to finalizing collection and destruction efficiency limits for the RTO.

Conceptual Proposal:

1. Nailite has agreed to substantially improve capture efficiency in accordance with a plan submitted to DERM and FDEP on May 1, 2003. Nailite's plan to improve capture of VOCs, proposes enclosing the existing open areas as follows:
   i) Enclose the following existing open areas in Paint Line 1 to capture the flashed off solvent, and send the air/solvent mixture to the RTO:
      a. The conveyor system between the booths.
      b. The conveyor system between the final paint booth and the entrance of the curing oven.
      c. Infrared curing oven.
      d. The conveyor cleaning system.
   ii) Enclose the following existing open areas in Paint Line 2 to capture the flashed off solvent, and send the air/solvent mixture to the RTO:
      a. The conveyor system between the booths.
      b. The conveyor system between the final paint booth and the entrance of the curing oven.
      c. The conveyor cleaning system.

Compliance Plan:

1. The purpose of this Compliance Plan is to set appropriate milestones/requirements for the company to follow in order to complete construction and testing necessary to establish final collection and destruction efficiency limits for the RTO.
   i) Nailite shall make necessary modifications to improve collection of VOC vapors from Paint Lines 1 and 2;
   ii) After making any system modifications, Nailite shall conduct performance testing to determine the capture and destruction efficiencies of the RTO System and submit the applicable test results to the DERM and FDEP within 45 days after the last test run pursuant to Rule 62-297.310(8), F.A.C but no later than April 1, 2004. Nailite shall notify FDEP and the DERM in writing at least 15 days prior to any performance tests pursuant to Rule 62-297.310(7)(a)9., F.A.C. The FDEP's address for notification is noted in condition 1. iii), below. DERM's address for notification is:

      Ms. Mallika Muthiah, Chief
      Air Facilities Section
      33 S.W. 2 Avenue, Suite 900
      Miami, Florida 33130-1540

   Any performance tests shall be conducted using approved methodology established in the AC and as agreed upon with Miami-Dade County DERM.

iii) Nailite shall apply for an air construction permit revision to establish final collection and destruction values for the RTO from the New Source Review Section of the FDEP pursuant to Rules 62-4.050, 62-4.070, 62-210.300(1), 62-212.400(2)(d) and 62-212.400(7)(a), F.A.C., by June 30, 2004. All construction permit applications must be submitted to:

Ms. Trina L. Vielhauer, Chief
Bureau of Air Regulation
2600 Blair Stone Road
Mail Station #5505
Tallahassee, Florida 32399-2400

2. Title V Air Operation Permit Revision or Air Operation Permit. Nailite shall submit an application for a Revision to the Title V Air Operation Permit to DERM to incorporate the terms and conditions established in the AC issued pursuant to paragraph 1(iii), above, within 30 days of the AC's issue date, Pursuant to Rules 62-4.050, 62-4.070, 62-210.300(2), 62-212.400(7)(b) and 62-213.420, F.A.C.

3. Nailite shall operate the facility no more than 7,280 hours per year] such that it does not constitute a Major Facility for purposes of Chapter 62-212, F.A.C., F.A.C.

A copy of this letter shall be filed with the referenced permit and shall become part of the permit. This permitting decision is issued pursuant to Chapter 403, Florida Statutes.

Any party to this permitting decision (order) has the right to seek judicial review of it under section 120.68 of the Florida Statutes, by filing a notice of appeal under Rule 9.110 of the Florida Rules of Appellate Procedure with the clerk of the Department of Environmental Protection in the Office of General Counsel, Mail Station #35, 3900 Commonwealth Boulevard, Tallahassee, Florida, 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate District Court of Appeal. The notice must be filed within thirty days after this order is filed with the clerk of the Department.

Executed in Tallahassee, Florida.
