---

Joe,

Attached is the peer reviewed d/p permit for Gulf Crist. There are several changes to your engine sections that need to be transferred to your working version of the draft/proposed permit. DO NOT accept all changes in this and replace your working version, because this copy does not include the corrections you have already made to your draft based on my comments and corrections in your SOB. Look at each change carefully and review the RICE rules so that you will understand why I made these changes. Be sure to ask me if you have any questions about why I changed the conditions this way or especially if you see a more appropriate requirement from the RICE rules for your engines.

Let me know when you are done working in the Appendix section and I will review it.

Jon
