Date: Thursday, August 08, 2013 2:24:12 PM

Jon,

Please see the below completion dates for the Unit 8 turbine upgrades as permitted by Permit No: 0850001-026-AC.

Unit 8B	**11/21/12**
Unit 8A	**12/17/11**
Unit 8C	**12/21/11**
Unit 8D	**12/20/11**

Please let me know if you have any further questions.

Jeff

Jon,

I will follow-up this morning with our Power Generation Division (PGD) environmental folks who

conducted this study. An answer to your inquiry will be provided shortly…

Thank you,

Jeff

Thank you, Jeff. Yes, that is what I was trying to find. The AC permit contains a condition that suggested this information would be submitted with the Title V revision application and I wasn't able to find it in the current renewal application. Do you know when the upgrades were completed? The AC permit requires 5 years of reporting for actual emissions following the change. These five years commence with the first full year following completion of the project. So, if the upgrades were finished in 2013, then the 5 years of future actual emissions reporting will begin in calendar year 2014 (reported in 2015) and will run for the duration of this renewed Title V permit. However, if the upgrades were completed in 2012, then the 5-year period begins with calendar year 2013 and will end one year before this permit expires.

Importance: High

Jon,

From your voicemail this morning, I believe your inquiry may be related to the required Subpart KKKK analysis in the air construction permit project #26 for the Martin Unit 8 turbine upgrades. A letter was submitted to the Department on March 7, 2013 to satisfy this requirement (please see attached).

Please let me know if you would like to discuss further.

Thank you,

Jeff
