Appendix I-1, List of Insignificant Emissions Units and/or Activities.

New Millennium	**DRAFT Permit No.:** 0230046-003-AV
Lake City	**Facility ID No**.: 0230046

The facilities, emissions units, or pollutant-emitting activities listed in Rule 62-210.300(3)(a), F.A.C., Categorical Exemptions, are exempt from the permitting requirements of Chapters 62-210 and 62-4, F.A.C.; provided, however, that exempt emissions units shall be subject to any applicable emission limiting standards and the emissions from exempt emissions units or activities shall be considered in determining the potential emissions of the facility containing such emissions units. Emissions units and pollutant-emitting activities exempt from permitting under Rule 62-210.300(3)(a), F.A.C., shall not be exempt from the permitting requirements of Chapter 62-213, F.A.C., if they are contained within a Title V source; however, such emissions units and activities shall be considered insignificant for Title V purposes provided they also meet the criteria of Rule 62-213.430(6)(b), F.A.C. No emissions unit shall be entitled to an exemption from permitting under Rule 62.210.300(3)(a), F.A.C., if its emissions, in combination with the emissions of other units and activities at the facility, would cause the facility to emit or have the potential to emit any pollutant in such amount as to make the facility a Title V source.

The below listed emissions units and/or activities are considered insignificant pursuant to Rule 62-213.430(6), F.A.C.

Brief Description of Emissions Units and/or Activities

1. Four (4) 30 gallon parts washers.
2. Two (2) 5,000-6,000 gallon above ground storage tank (AST) for Deck Line water based paint.
3. Drum and tote storage of paint.
4. On-site Method 24 VOC Testing (uses 1-2 gallons of Toluene PER YEAR).
5. Aerosol Spray Paint used for marking steel sizes (very small usage, not used as a "production coating" – an entire bundle of steel will get color coded with a small spot of paint which enables other employees to easily know the steel size).
6. Yellow and red aerosol safety paint, used to paint walkway lines on plant floor, and for painting safety guards, railing, etc. Maintenance type coating.
7. Edge Sealer Coating used periodically on Deck Line (contained on original emission calculations spreadsheet).
8. Evaporative Oil coating used periodically on Deck Line (contained on original emission calculations spreadsheet).
9. Miscellaneous maintenance type coatings.
10. Diesel Fuel tank for on-site vehicle fueling.
11. CO_2 and Argon Welding Gas Storage Tanks.
12. Steel slitting operations.
13. Wastewater Treatment Activities, and Oil Removal.
14. On-site Method 24 VOC Testing (uses 1-2 gallons of Toluene per year).

15. Three (3) natural gas-fired water heaters with 9 MMBTU/hr total capacity.
16. Welding.
17. Natural gas-fired make-up air units for building heat.
18. Application of fungicide, herbicide, or pesticides.
