Federally Enforceable State Operating Permit (FESOP)
Alturas Facility

This is the initial operation permit for an existing abrasive blasting facility. RSR Industrial Coatings, Inc. has been in operation since 2006, but the blast material throughputs did not approach permitting threshold until late 2011. With this permit, facility's abrasive blasting operation will be limited to an annual throughput of 450 tons of blast material. The facility also conducts surface coating operations, but this activity has been determined to be exempt from permitting due to low material usage.
