Dear Mr. Werner:

This is in response to your consultant's letter of April 19, 2000, requesting an amendment to your construction permit. By this letter permit 1130031-004-AC is amended as follows:

Air Permit Number 1130031-004-AC is changed to 1130031-005-AC.

Section I. Subsection A. Facility Description. Second paragraph is changed from:

This construction permit authorizes the facility to increase the maximum production rate for packaging of dry concrete products from 30 to 45 tons per hour and to increase the maximum rate of aggregate drying operations from 40 to 55 tons per hour. The increase in the aggregate drying operation will also increase the dryer fuel usage rate by approximately 38%.

To:

This construction permit authorizes the facility to increase the maximum production rate for packaging of dry concrete products from 30 to 45 tons per hour plus 10 tons per hour of sand and to increase the maximum rate of aggregate drying operations from 40 to 55 tons per hour. The increase in the aggregate drying operation will also increase the dryer fuel usage rate by approximately 38%.

Specific Condition A.1. is changed from:

A.1. Capacity. The maximum allowable operating rate is 55 tons of aggregate fed to the rotary drum dryer, 45 tons of cement concrete premix bagged per hour, and 25 tons of cement/fly ash loaded to the silos per hour. These are the rates at which compliance with standards shall be demonstrated.

[Rules 62-4.160(2) and 62-210.200(PTE), F.A.C.]
