

P.E. CERTIFICATION STATEMENT

PERMITTEE

Genesis Crude Oil, L.P.
919 Milam Street, Suite 2100
Houston, Texas 77002

Project No. 1130160-005-AC
Jay Station
Minor Source Air Construction Permit
Crude Oil Pipeline & Truck Unloading
Santa Rosa County, Florida

PROJECT DESCRIPTION

This project incorporates the Jay tanker truck unloading station, Facility ID No. 1130159, into the Jay pipeline station, Facility ID No. 1130160. These two adjacent facilities are currently operating under separate Federally Enforceable State Operating Permits (FESOP) and will be combined as is with no actual construction or increase of combined emissions into one facility. The existing Jay pipeline station, comprised of three external floating roof tanks with associated piping and pumps, receives crude oil from gathering lines that originate at tanker truck unloading stations. Crude oil is pumped into holding tanks and then is pumped into an outbound pipeline. The Jay tanker truck unloading station consists of one fixed-roof storage tank with associated piping and pumps, which transfers crude oil from tanker trucks, through a gathering line, to storage tanks at the Jay pipeline station.

The storage tanks at the Jay pipeline station were constructed in 1972 and therefore are exempt from EPA regulations for New Source Performance Standards for Volatile Organic Liquid Storage Vessels (40 CFR 60 subpart K). The storage tank at the Jay truck unloading station is exempt from 40 CFR 60 subpart Kb - Standards of Performance for Volatile Organic Liquid Storage Vessels, because its capacity of 73.78 m³ is less than the threshold capacity of 75 m³.

The Department's full review of the project and rationale for issuing the draft permit is provided in the Technical Evaluation and Preliminary Determination.

I HEREBY CERTIFY that the air pollution control engineering features described in the above referenced application and subject to the proposed permit conditions provide reasonable assurance of compliance with applicable provisions of Chapter 403, Florida Statutes, and Florida Administrative Code Chapters 62-4 and 62-204 through 62-297. However, I have not evaluated and I do not certify any other aspects of the proposal (including, but not limited to, the electrical, mechanical, structural, hydrological, geological, and meteorological features).
