**Subject:** September 19: Update: Reliant Energy Indian River (ORIS 055318) (Facility ID No. 0010196)

Good afternoon,

The plant did not run today and is not scheduled to run Saturday, Sunday, or Monday. The total number of hours on oil has not changed.

Have a nice weekend.  
Amy

**Subject:** September 18: Update: Reliant Energy Indian River (ORIS 055318) (Facility ID No. 0010196)

Hi Wanda and Garry,

The units that were requested to run today were cancelled. No units are requested to run tomorrow. Therefore, still no change in the total number of hours on oil.

Thanks,  
Amy

**Subject:** September 17: Update: Reliant Energy Indian River (ORIS 055318) (Facility ID No. 0010196)

Hi Wanda and Garry,

The story today is exactly the same as yesterday. The units were cancelled today, so nothing ran. Units 1 and 2 are again requested for tomorrow on 100% gas.

The total number of hours on oil has not changed.

Thanks,  
Amy

**Subject:** September 16: Update: Reliant Energy Indian River (ORIS 055318) (Facility ID No. 0010196)

Hi Wanda and Garry,

Although Indian River Units 1 and 2 were scheduled to run today on 100% gas, they were cancelled. The same schedule (Units 1 & 2 on 100% gas) has been requested for tomorrow.

The total number of hours of oil has not changed since the last update.

Thanks,  
Amy

**Subject:** RE: September 12: Update: Reliant Energy Indian River (ORIS 055318) (Facility ID No. 0010196)

Hi Wanda and Garry,

Indian River did not run Saturday or Sunday. Today, Units 1 and 2 are running on 100% gas. Unit 3 did not run today after all, due to a forced outage. Units 1 and 2 are scheduled to run again tomorrow on 100% gas. The total number of hours on oil has still not changed since the last update. So far so good!

Thanks,  
Amy

**Subject:** September 12: Update: Reliant Energy Indian River (ORIS 055318) (Facility ID No. 0010196)

Hi Wanda and Garry,

After my message yesterday, Indian River was requested to run today – just Units 1 and 2 on 100% gas. Therefore, the total number of hours on oil has still not changed since the last update.

Currently, we are not scheduled to run Saturday or Sunday, but we are scheduled to run all three units Monday. If we run as scheduled, Units 1 and 2 will burn 100% gas, but Unit 3 will burn 60% gas (40% oil). This will raise the total number of hours on oil for Unit 3 to about 300. We do not feel like that warrants scheduling a test at this time, but if we receive information on Monday indicating that we will be likely to run for the remainder of the week, we would need to consider setting one up. This will be influenced by the affects of the hurricane on gas availability in the state. If we have to do so, it would most likely be for Unit 3 only and would be during the middle or end of next week. I will continue to keep you posted.

Thank you,  
Amy

Hi Wanda and Garry,

Indian River did not run today (9/11/08) and are not scheduled to run tomorrow (9/12/08). The total number of hours on oil has not changed since the last update.

Thanks,  
Amy

Wanda and Garry,

Thank you for your consideration of our circumstances!

None of the units are running today and at this time are not scheduled to run tomorrow. I will update you tomorrow and thereafter.

Amy

We can accept a test notice of less than 15 days. I would like to have as much notice as possible, but if necessary you could send an email a day or 2 before the test. This is a special situation and the offer to accept a very short test notice applies only to this situation.

Daily status updates would be helpful. They could be done by email and would not need to be done on weekends.

If you have questions, please call me at 407 893 3992 or send an email to Garry.Kuberski@dep.state.fl.us

**Subject:** Update: Reliant Energy Indian River (ORIS 055318) (Facility ID No. 0010196)

Hello Gary, Wanda, and Jim:

As of today, here is the updated total of oil operating hours for the units at Indian River.

Unit 1 – 92 hrs  
Unit 2 – 250 hrs  
Unit 3 – 292 hours

Some oil firing took place throughout this week due to limited gas availability during the storm. However, we are not running today and are not scheduled to run through Monday so we seem to have gotten through the situation without reaching 400 hours on any of the units.

If we did have to run on oil again for several more days, there are two scenarios we are concerned about, however. That we would hit 400 hours on a unit and then:

1. Not get called on to run again the rest of the month and then have to burn considerable amounts of oil for testing when the load is not required
2. Not have enough days left in the month to enable us to provide 15 days advance notice prior to testing

We would like to know if the Department could work with us on the 15 day notification requirement so we would have the flexibility to attempt to schedule a test while we are running if we do have to run again. This could potentially be on fairly short notice, but I would be willing to send Gary a status update every working day between now and the end of the month so he would know exactly what was going on and could plan a trip over (if he wanted to do so) if a test was scheduled.

We are also willing to discuss the situation by telephone if you require further information to respond to our request.

Thank you,  
Amy

To All:

Annual compliance testing for Emissions Unit No. 008 (Lime Storage Silo) will be conducted at Reliant Energy Indian River on September 18.

Please contact me if you have any questions.

Thank you,  
Amy Deese
