Permitting will issue an Administrative Correction of the Title V permit. We will update ARMS also.

Thanks.

Cindy

Cindy,

Good morning.

Do you want permitting to update address info for Yellowfin? This is a unique situation so wasn't sure how you wanted to proceed. Just let me know.

Thank you,
Danielle

Hi Danielle,

How should I best ARMS update the new address for closed molding operations and the facility office?

Most operations are still at the same locations.

I know I should definitely change the address of the related party (since the office has changed).

There are two lines in ARMS for the address (directions and street). Maybe I can put the office as the address, and in the directions line I can put the facility operations (with a comment).

Please let me know.

Thanks,
Amaury

Subject: Yellowfin Yachts, Inc., Facility ID 0810211, Address change letter

Hi Cindy, Danielle, and Nancy,

I have included in this e-mail the electronic version of the address change letter for Yellowfin Yachts, Inc., Title V Air Operating Facility ID 0810211. The new address is for the facility office and insignificant air emissions operations, specifically closed molding operations. Open molding operations still take place in old address.

I plan to electronically file this letter shortly.

Thank you,
Amaury

Please allow this letter to inform the department that Yellowfin Yachts Inc has moved a portion of its fiberglass manufacturing to a new facility approximately ½ mile away from Yellowfin's main facility.

To better streamline manufacturing and increase efficiencies during the build process, it was imperative that we increase our floor space. This allows Yellowfin to keep all molds inside the facility and reduces the need to move molds around to put into production.

Yellowfin purchased a new facility located at:

Yellowfin Yachts Inc.

2059 58th Ave Circle East

Bradenton, Fl 34203

This will also serve as Yellowfins new mailing address.

Yellowfin started manufacturing in the new facility approximately June 11, 2012 coinciding with model year change.

Yellowfin moved small boat operations consisting of models 17,21 and 24 to the new facility. All three models are manufactured using closed molding techniques.

The facility located at 6611 19th St East is still being used for large boat operations using open molded techniques as well as closed molded techniques. The removal of the small boat group from this facility will allow Yellowfin to place molds in their own location reducing the need to move molds in and out of the facility.

If you have any further questions, please feel free to contact me.

Sincerely,

Wylie Nagler, President
