<sup>1</sup> Each month's value includes emissions from that month, plus emissions from previous 11 months. For example, January 2008 covers the period Feb. 1, 2007 - Jan. 31, 2008.

<sup>2</sup> "Total HAPs" includes methanol, phenol, and formaldehyde.

<sup>3</sup> Annual rolling total for glue room will always be the Annual Total since the tank will always contain resin and therefore the values do not vary.
