COMMENTS: Mr. Jason Curry provided access to the facility and all required records for this inspection. The crematory was operating at the time of this inspection, and the 2012 Method 9 VE test was conducted at this time. Records for the last VE testing were provided. Mr Henry Hernandez performed the annual VE testing on 8/26/2011 which resulted in a 0% opacity. The CEMS temperature charts are kept on file at the facility and several random charts from the last twelve months were reviewed, and all demonstrated the unit operating above 1600 degrees during the cremations. Copies of the training certificates for the crematory operator were available for review. The containers used at this facility are manufactured by McDonald Container, and the facility was able to produce documentation from McDonald Container certifying their products are composed of 0.5% or less by weight chlorinated plastics. The facility appeared clean and well maintained at the time of this inspection, and no objectional odors were noticed.
