**COMMENTS:** Level III inspection. Robert Beck is the plant operator during this site visit. The facility is conducting VE to comply with the annual testing requirement. No visible emissions noted while observing loading of the silo. Review of record showed fuel usage for calendar year 2010 up to this date = 1427 gallons of low sulfur diesel; total material production = 1543 cubic yards (3086 tons). Silos # 1, #2 and #3(EU-001,002 and 003 ) are currently used as cement silos while Silo #4 (EU-004) is used for flyash.
