COMMENTS: Department personnel conducted an unannounced annual air program compliance inspection on June 5, 2009 at the Ready Mix USA Crestview facility located in Okaloosa County. Mr. Cordell Crooks, lead driver, was present to assist during the inspection.

The facility was in operation at the time of the inspection. There are three storage silos on site, one for cement and two for flyash. The second flyash storage silo was installed in early 2009. Particulate emissions are controlled by a baghouse located on top of each of the storage silos. Visual inspections of the baghouses are conducted monthly and logged. Emissions from the weigh hopper (batcher) are controlled by a spraybar.

According to facility personnel, fugitive emissions from the yard are controlled by a sweeper and wetting the yard as needed. Speed limit signs were posted at the entrance, also.

Materials purchased on a monthly basis are tracked and records were available for review during the inspection.

Lisa Swain with HS&E Resources, Inc., conducted the annual visible emissions test for each of the baghouses on June 5, 2009 and Department personnel were on site to observe. The new flyash storage silo was experiencing emissions which exceeded the 5% opacity limit. Loading of the silo was halted and, according to Mr. Crooks and Ms. Swain, the test will be rescheduled after repairs are made.
