COMMENTS: On December 7, 2011, Department personnel conducted an unannounced annual air program compliance inspection at the Ready Mix USA Crestview facility located in Okaloosa County. The facility was in operation at the time of the inspection. Emission units consist of three storage silos, one for cement and two for flyash. Particulate emissions are controlled by a baghouse located on top of each of the storage silos. The facility is equipped with an enclosed shoot and spray bar to control emissions from the truck loading area. All production records are tracked electronically. Testing for visible emissions was conducted on July 21, 2011. Test results indicate an average opacity of 0% on all three emission units.

Questions above that were unanswered are not applicable to this facility.
