COMMENTS: No pre-inspection review was conducted for this facility inspection. Inspection Findings: This facility was not in operation during my visit to the site. Access gates to the facility were closed and locked. This facility had Visible Emissions (VE) testing on September 8, 2009 on all of its emission units (EU's). On 09/23/2009 I spoke with Mr. Hank Belcher, Environmental Safety and Health Director for Preferred Materials. He stated this facility has been "moth balled" and all employees have been laid off. Mr. Belcher recently sent a list of "moth balled" facilities that will not be operated, but permits will continue to exist, to Mr. Dick Dibble of DEP in Tallahassee. Mr. Belcher offered to send that information to me and I provided my email address. Information is attached to this inspection report. Next test date was changed to 12/31/2010.
