Inspector's Signature	Approximate Date of Next Inspection

COMMENTS: On October 16, 2013 an inspection was performed at the Panhandle Animal Welfare clinic. At the time of the inspection records of preventative maintenance, adjustments, calibrations were not maintained for the months of June - September. The operator indicated that a manufacture technician had recently performed maintenance in the cremation unit, but the records of maintenance could not be provided.

On October 24, 2013, I called the facility representative, Ms. Dee Thompson, to offer compliance assistance in regards to the missing records. Ms. Thompson indicated that she would locate the records from the maintenance that was recently performed on the cremation unit and check with the operator to ensure records of preventative maintenance is being documented.

On November 7, 2013, a follow-up inspection was performed. Records were being maintained and indicate compliance with the permit limits.
