1 Is these Continuous Emissions Monitoring System (CEMS) equipment installed on each unit to record	tommonote	mag in the
1. Is there Continuous Emissions Monitoring System (CEMS) equipment installed on each unit to record primary and secondary chambers where there is a 1.0 second gas residence time in the secondary chamber of		
accordance with the manufacturer's instructions?		\square No
a) Do temperature probes seem to be properly placed?		\square No
b) Are the following records kept on file, available for inspection for at least two years following the re		
measurements, maintenance, reports and records?	or uning of	
1) All measurements (including CEMS)	⊠Yes	□ No
2) Monitoring device	Yes	□ No
3) Performance Testing Measurements	Yes	No
4) CEMS Performance Evaluation	Yes	No
5) All CEMS or monitoring device calibration checks	Yes	No
6) Adjustments	Yes	🗍 No
7) Preventive maintenance performed on systems/devices	Yes	D No
8) Corrective maintenance performed on systems/devices	Yes	D No
2. Was this crematory unit constructed: (check only one \square box)		
a) BEFORE August 30, 1989? (If this box checked, continue on to #3 and skip #4)		
b) D ON or AFTER August 30, 1989? (If this box checked, skip #3 and continue on to #4)		
3. If constructed BEFORE August 30, 1989 is the:		
a) secondary chamber combustion zone providing at least a 1.0 second gas residence time @ 1600°F?	Yes	🗌 No
b) actual operating temperature of the secondary chamber combustion zone no less than 1400°F		
throughout the combustion process in the primary chamber?	Yes	🗌 No
c) cremation in the primary chamber begun after the secondary chamber combustion zone temperature		
is equal to or greater than 1400°F?	Yes	🗌 No
d) required monitoring equipment installed and operational, and providing continuous monitoring to		
record the temperature at the point or beyond where 1.0 second gas residence time is obtained in the	_	
secondary chamber combustion zone according to the manufacturer's instructions?	Yes	No
4. If constructed <u>ON</u> or <u>AFTER</u> August 30, 1989 is the:		
a) volume in the secondary combustion zone sufficient to provide at least a 1.0 second gas residence time		_
@ 1800 [°] F?	⊠Yes	No No
b) the actual operating temperature of the secondary chamber combustion zone no less than 1600°F	5-7	—
throughout the combustion process in the primary chamber?		No
c) secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremation		
process begins in the primary chamber?	⊠Yes	∐ No
5. Are appropriate leak-proof containers containing no more than 0.5 % (percent) by weight chlorinated		
plastics used during the cremation of dead animals?	🛛 Yes	∐ No
a) If the answer to question 4 above is YES, is certifying documentation from the manufacturer that the		
are composed of 0.5% or less by weight chlorinated plastics kept on file at the site for the duration of		
b) If plastic bags are used for the cremation of animals are they non-chlorinated and no less than 3 mils	🛛 Yes	No
b) If plastic bags are used for the cremation of animals are they non-chlorinated and no less than 5 mills thick?		
c) Are dead animals, which have been used for medical or commercial experimentation, or other	🛛 Yes	∐ No
	Yes	\square No
materials, including biomedical wastes (Rule 62-210.200, F.A.C.), incinerated at this location? 6. During this review period, was the largest batch load cremated 500 pounds per hour or less?	\boxtimes Yes	⊠ No □ No
 7. Have all crematory operators been trained and certified by a Department-approved training program? 	\boxtimes Yes	\square No \square No
 a) Are copies of the training certificates all crematory operators kept on file at the facility for the durati 		
of the operator's employment & for an additional two years after termination of employment?	Yes	No No
of the operator's employment & for an additional two years after termination of employment?		

PART IV: <u>SPECIAL CONDITIONS AND PROCEDURES</u> – Rule 62-296.401, F.A.C. A. <u>New or Modified Process Equipment</u>		
1. Since the last inspection has there been		
a) installation of any new process equipment?	Yes	🛛 No
b) alterations to existing process equipment without replacement?	Yes	🛛 No
 c) replacement of existing equipment substantially different than that noted on the most recent notification form? 	Yes	🛛 No
d) If you answered <u>YES</u> to any of the above, did the owner submit a new and complete		
notification form and appropriate fee (Rule 62-4.050, F.A.C.) to the appropriate DEP or local program office?	Yes	No
If a crematory unit has been modified to the extent that a Department air construction permit was required, have all operators been retrained to operate the modified unit?	Yes	No
3. In the case of new or modified equipment, where a Department air construction permit was required, has the owner submitted copies of all operator training certificates?a) submitted within the 15 day required window following the training?	☐Yes ☐Yes	□No □No

Ι	M N	S N	
I N	C	C	B. Specific Conditions
			Animal crematory units shall cremate only animal remains and, if applicable, the bedding associated with the animals and appropriate containers. Containers shall contain no more than 0.5 percent by weight chlorinated plastics as demonstrated by the manufacturer's data sheet. If containers are incinerated, documentation from the manufacturers certifying that they are composed of 0.5 percent or less by weight chlorinated plastics shall be kept on-file at the site for the duration of their use and for at least two (2) years after their use. [62-296.401(6)(d), F.A.C.] Comments: Reviewed records for the months of 6/1/06 through 5/14/07. The highest reported chlorine content was $_0$ % Supporting documentation was verified (\boxtimes Yes or \square No)
			 Animal crematory units shall not cremate dead animals which were used for medical or commercial experimentation. No other material, including biomedical waste as defined in Rule 62-210.200, F.A.C., shall be incinerated. [62-296.401(6)(d), F.A.C.] <i>Comments: The facility was observed only having animal remains on site.</i>
			Equipment Maintenance. All animal crematory units shall be maintained in proper working order in accordance with the manufacturer's specifications to ensure the integrity and efficiency of the equipment. If a crematory unit contains a defect that affects the integrity of the unit, the unit shall be taken out of service. No person shall use or permit the use of that unit until it has been repaired or adjusted. Repair records on all crematory units shall be maintained onsite for at least two (2) years. A written plan with operating procedures for startup, shutdown and malfunction of each crematory unit shall be maintained and followed during those events. Each unit's burners shall be operated with a proper air-to-fuel ratio. If the unit so allows, the burners' flame characteristics shall be visually checked at least once during each operating shift and adjusted when warranted by the visual checks. [62-296.401(6)(e), F.A.C.]
			Continuous Monitoring Requirements. Each animal crematory unit shall be equipped and operated with a continuous monitor to record temperature at the point or beyond where 1.0 second gas residence time is obtained in the secondary chamber combustion zone in accordance with the manufacturer's instructions. In addition, each crematory unit installed after February 1, 2007, shall be equipped and operated with a pollutant monitoring system to automatically control combustion based on continuous in-stack opacity measurement. Such system shall be calibrated to restrict combustion in the primary chamber whenever any opacity exceeding fifteen percent (15%) opacity is occurring. A complete file of all temperature measurements; all continuous monitoring system, monitoring device, and performance testing measurements; all continuous monitoring system, preventive maintenance, and corrective maintenance performed on these systems or devices, shall be recorded in a permanent legible form available for inspection. Continuous temperature monitoring documentation shall include operator name, operator indication of when cremation in the primary chamber was begun, date, time, and temperature markings. Pollutant monitoring system documentation shall include indication of when the opacity measurement system was cleaned and checked for proper operation in accordance with the manufacturer's recommended maintenance schedule. The file shall be retained for at least two (2) years following the recording of such measurements, maintenance, reports, and records. [62-296.401(6)(h)(i), F.A.C.] Comments: Reviewed temperature charts for the months of $6/1/06$ through $5/15/07$. The last calibration on the temperature probe appears properly placed (\boxtimes Yes or $\Box No$)
			The owner or operator shall notify the Department, at least 15 days prior to the date on which each formal compliance test is to begin, of the date, time, and place of each such test, and the test contact person who will be responsible for coordinating and having such test conducted for the owner or operator. [62-297.310(7)(a)9. F.A.C.]
			Comments: The County was notified on 4/10/07, for the test that was conducted on 5/1/07

I N	M N C	S N C	B. Specific Conditions		
			Test Reports The required test report shall be filed with the PCDEM as soon as practical but no later than 45 days after the test is completed. [Rules 62-213.440 and 62-297.310(8), F.A.C.]		
			Comments: The last test was conducted on 5/1/07, and the test results were submitted on 5/23/07.		
\boxtimes			Process Rate		
			Comments: The maximum batch load for this crematory unit is 300 pounds. The largest batch load cremated during this review period was 150.		
I	M N	Ν			
N	С	С	C. Selected General Conditions and Procedures		
\boxtimes			 If, for any reason, the owner or operator of any facility operating under an air general permit pursuant to Rule 62-210.300(4)(a), F.A.C., does not comply with or will be unable to comply with any condition or limitation of the permit, the permittee shall immediately provide the Department with the following information: A description of and cause of noncompliance; and The period of noncompliance, including dates and times; or, if not corrected, the anticipated time the noncompliance is expected to continue, and steps being taken to reduce, eliminate, and prevent recurrence of the noncompliance. The permittee shall be responsible for any and all damages which may result. [62-210.310(3)(i), F.A.C.] <i>Comments: Ms. Lockwood stated the emission unit had not had any upsets condition.</i>		
\boxtimes			Valid Permit		
]			To avoid lapse of authority to operate, an owner or operator intending to use, or continue to use, an air general permit must submit the proper registration form and processing fee at least thirty (30) days prior to expiration of the facility's existing air operation permit or air general permit. [62-210.310(2)(c)2., F.A.C.] <i>Comments: The permit expires on 7/4/08. A new notification form is required to be submitted no later than 6/4/08.</i>		
\boxtimes			Equipment Changes. The owner or operator shall maintain records of all equipment changes. In the case of installation of new process or air pollution control equipment, alteration of existing process or control equipment without replacement, or replacement of existing process or control equipment with equipment substantially different in terms of capacity, method of operation, material processed, or intended use than that noted on the most recent registration form, the owner or operator shall submit a new and complete air general permit registration form for the facility with the appropriate fee pursuant to Rule 62-4.050, F.A.C. to the Department, provided, however, that any change that would constitute a new major stationary source, major modification, or modification that would be a major modification but for the provisions of paragraph 62-212.400(2)(a), F.A.C., shall require authorization by air construction permit. [62-210.310(2)(e)., F.A.C.]		
D. Other:					
Clo	osing	g Co	nference		
	Other Comments: The emission unit was not in operation at the time; therefore VE test was not observed. Reviewed records for the months of 6/1/06 through 5/15/07 indicated emission unit in compliance.
