- (1) Operating parameters of the pollution control device;
- (2) Time table for the routine maintenance of the pollution control device as specified by the manufacturer;
- (3) Time table for routine periodic observations of the pollution control device sufficient to ensure proper operation;
- (4) A list of the type and quantity of the required spare parts for the pollution control device which are stored on the premises of the permit applicant;
- (5) A record log which will indicate, at a minimum:
 - a. When maintenance and observations were performed;
 - b. What maintenance and observations were performed; and
 - c. Who performed said maintenance and observations.
 - d. Acceptable parameter ranges for each operational check.

[Pinellas County Code, Subsection 58-128]

Reviewed records for the months of January 22, 2010 – January 11, 2011

Comments:

The facility maintains a Monthly Inspection Form for this unit. The maintenance log appeared complete and well documented for the year. The forms changed in July 2010 as a result of an earlier O&M Plan review by Air Quality; therefore, January – June 2010 maintenance documentation is on a different form than July – December 2010. I have attached a copy of the July – December log.

The yard was clean and I observed no airborne emissions during my visit. According to the sweeper log, the yard is commercially swept once a week and Ernie stated high traffic areas are scraped and swept daily. Ernie stated the yard is also watered as needed. The stock piles are kept at a reasonable level with 3-wall enclosures and are outfitted with sprinklers to control airborne dust.

Exit Interview:

I informed Ernie that the facility appears to be in compliance at this time. I further told him that if, after further review of the file and copies of the log, there were any concerns then I would contact Jason Jones, the facility Representative.
