PART II: <u>TESTING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-296.414, F.A.C. – (continued)
(check 🗹 appropriate box(es)
Compliance Demonstration - (Rule 62-296.401(5)(i), F.A.C.)
1. Is each dust collector exhaust point tested according to the visible emissions limiting standard as part of the
annual compliance demonstration? (Rule 62-297.310(7)(a), F.A.C.) Xerrore Compliance demonstration? (Rule 62-297.310(7)(a), F.A.C.)
New Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)
2. Did this facility demonstrate:
a) initial compliance no later than 30 days after beginning operation?
b) annual compliance within 60 days prior to each anniversary of the air general permit notification form
submittal date? [Yes] No
Existing Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)
3. In order to demonstrate annual compliance, was an annual visible emissions test conducted 60 days prior to
the AGP Notification form submission, and within 60 days prior to each anniversary date? Xes No
Test Reports – (Rules 62-213.440, F.A.C. and 62-297.310(8)(b), F.A.C.)
4. Was the required test report filed with the department as soon as practical, but no later than 45 days after the
test was completed? XYes No

PART III: <u>OPERATING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-210.300(4)(c)2., F.A.C.	
(check ☑ appropriate box(es))	
1. Is this facility: 1) a stationary ⊠; 2) a relocatable □; or does it have: 3) both, stationary and relocatable concrete batching and/or nonmetallic mineral processing plants? (<i>Please check ⊠ only one box.</i>)	;
 2. If this is a stationary concrete batching plant, is there one or more relocatable nonmetallic mineral processin plants using individual air general permits at the same location? (<i>If your answer to this question is YES, then proceed to questions 2.a), thru 2.d</i>),) <i>below.</i>)	ng Yes No Yes No Yes No Yes No Yes No Yes No
 3. Does the owner/operator of the concrete batching plant maintain a log book or books to account for: a) fuel consumption on a monthly basis? b) material processed on a monthly basis?	□Yes □ No □Yes □ No □Yes □ No

PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-296.414(2)(a) and (b), F.A.C. (continued) (check ☑ appropriate box(es))

Unconfined Emissions - (Rule 62-296.320(4)(c), F.A.C.)

1.	Does the owner /operator of the concrete batching plant take reasonable precautions to control unconfine
	emissions by:

a) management of roads, parking areas, stock piles, and yards, which shall include one or more of the following:	ng:
--	-----

1)) paving and maintenance of roads, parking areas, stock piles, and yards?	⊠Yes	No
2)) application of water or environmentally safe dust-suppressant chemicals when necessary to control		
	emissions?	⊠Yes	No No

- 3) removal of particulate matter from roads and other paved areas under control of the owner/operator to re-entrainment, and from building or work areas to reduce airborne particulate matter?----- Xes No
 - 4) reduction of stock pile height, or installation of wind breaks to mitigate wind entrainment of particulate matter from stock piles?------ Xes No

b) use of spray bar, chute, or partial enclosure to mitigate emissions at the drop point to the truck?----- \Box Yes \boxtimes No

PART IV: SPECIAL CONDITIONS AND PROCEDURES - Rule 62-210.300(4)(d)4., F.A.C. A. New or Modified Process Equipment 1. Since the last inspection has there been No b) alterations to existing process equipment without replacement?------No No c) replacement of existing equipment substantially different than that noted on the most recent notification form?------ Yes No

d) If you answered **YES** to any of the above, did the owner submit a new and complete notification form and appropriate fee (Rule 62-4.050, FAC) to the appropriate DEP or local program office?------ Yes No

Mike Ojo Thomas

Inspector's Name (Please Print)

8/5/07 Date of Inspection

Inspector's Signature

Approximate Date of Next Inspection

No

COMMENTS: The emission unit was not in operation (No pneumatic loading of silo at the time). I reviewed operation and maintenance records for the months of 10/1/06 through 8/6/07, the records were in compliance. See the attached Pinellas County inspection report form for additional information

N	C	C	B. Specific Conditions
			 Unconfined Emissions. The owner or operator shall take reasonable precautions to control unconfined emissions from hoppers, storage and conveying equipment, conveyor drop points, truck loading and unloading, roads, parking areas, stock piles, and yards as required by Rule 62-296.320(4)(c), F.A.C. For concrete batching plants the following shall constitute reasonable precautions: (a) Management of roads, parking areas, stock piles, and yards, which shall include one or more of the following: 1. Paving and maintenance of roads, parking areas, and yards. 2. Application of water or environmentally safe dust- suppressant chemicals when necessary to control emissions. 3. Removal of particulate matter from roads and other paved areas under control of the owner or operator to mitigate re-entrainment, and from building or work areas to reduce airborne particulate matter. 4. Reduction of stock pile height or installation of wind breaks to mitigate wind entrainment of particulate matter from stock piles. (b) Use of spray bar, chute, or partial enclosure to mitigate emissions at the drop point to the truck. [62-296.414(2)] Comments: The yard area has been swept prior to my arrival onsite. There was no unconfined material onsite.
\boxtimes			Visible emissions tests of silo dust collector exhaust points shall be conducted while loading the silo at a rate that is
			representative of the normal silo loading rate. The minimum loading rate shall be 25 tons per hour unless such rate is unachievable in practice. If emissions from the weigh hopper (batcher) operation are also controlled by the silo dust collector, the batching operation shall be in operation during the visible emissions test. The batching rate during the emissions test shall be representative of the normal batching rate and duration. Each test report shall state the actual silo loading rate during emissions testing and, if applicable, whether or not batching occurred during emissions testing. [62-296.414(3)(c), F.A.C.]
			process rate was limited to 25 tph.
\boxtimes			If emissions from the weigh hopper (batcher) operation are controlled by a dust collector which is separate from the silo dust collector, visible emissions tests of the weigh hopper (batcher) dust collector exhaust point shall be conducted while batching at a rate that is representative of the normal batching rate and duration. Each test report shall state the actual batching rate during emissions testing. [62-296.414(3)(d), F.A.C.]
			Comments: Emissions from the weigh hopper \Box are \boxtimes are not controlled by a separate dust collector. A separate test was not conducted at the appropriate rate.
			Each dust collector exhaust point shall be tested annually. New facilities permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits, shall demonstrate initial compliance no later than 30 days after beginning operation, and annual compliance within 60 days prior to each anniversary of the air general permit notification form submittal date. Existing facilities permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits, shall demonstrate compliance within 60 days prior to submitting an air general permit notification form and within 60 days prior to each anniversary of the air general permit notification form submittal date. [62-296.414(4), F.A.C.]
			Comments: The test should be completed between 4/13/07 and 6/13/07. The last test was conducted on 5/9/07, and the test results were submitted on 5/14/07.
\square			Test Reports The required test report shall be filed with the PCDEM as soon as practical but no later than 45 days after the test is completed. [Rules 62-213.440 and 62-297.310(8)(b), F.A.C.]
			Comments: The last test was conducted on 5/9/07, and the test results were submitted on 5/14/07.

I N N				
N C C	B. Specific Conditions			
F	 The pollution control equipment shall be operated and maintained in accordance to the operation and maintenance (O&M) plan. The O&M plan shall include, but is not limited to: Operating parameters of the pollution control device; Time table for the routine maintenance of the pollution control device as specified by the manufacturer; Time table for routine periodic observations of the pollution control device sufficient to ensure proper operation; A list of the type and quantity of the required spare parts for the pollution control device which are stored on the premises of the permit applicant; A record log which will indicate, at a minimum: When maintenance and observations were performed; What maintenance and observations were performed; and Acceptable parameter ranges for each operational check. 			
	Comments: Reviewed records for the months of 10/1/06 to 8/06/07 indicated emission unit in compliance.			
	C. General Procedure Requirements and Conditions			
r [Administrative Corrections. Within 30 days of any changes requiring corrections to information contained in the notification form, the owner or operator shall notify the Department in writing. Such changes shall include: a. Any change in the name of the authorized representative or facility address or phone number; or b. Any other similar minor administrative change at the facility or emissions unit. [62-210.300(4)(d)3., F.A.C.] 			
r r [Equipment Changes. In case of the installation of new process equipment, alteration of existing process equipment without replacement, or the replacement of existing process equipment with equipment substantially different than that noted on the most recent notification form, the owner or operator shall submit a new and complete general permit notification form with the appropriate fee pursuant to Rule 62-4.050, F.A.C., to the Department. [62-210.300(4)(d)4., F.A.C.]			
	A permittee's use of a general permit is limited to five years. No later than 30 days prior to the fifth anniversary of the filing of intent to use the general permit, the owner or operator shall submit a new notice of intent which shall contain all current information regarding the facility or emissions unit. Eligibility to use the general permit is not transferable and does not follow a change in ownership of the facility or emissions unit. Prior to any sale, other change of ownership, or permanent shutdown of the facility, the owner or operator is encouraged to notify the Department of the pending action. The owner shall remain liable for corrective actions that may be required as a result of any violations occurring in the time after the sale or legal transfer of the facility or emissions unit, but before a new owner is entitled to use an air general permit. [General Conditions - 62-210.300(4)(e)1., F.A.C.]

Comments:					
Closing Conference Yes No					
Comments: I told Ms. Espinosa the emission unit is deemed to be in compliance.					
Other Comments: I was not able to perform a visible emissions test at the time, as no tankers were on site, and not batching at the time of the inspection. Reviewed records for the months of 10/1/06 through 8/6/07, the records were in compliance.
