PART VI: Comments				

The pollution control equipment shall be operated and maintained in accordance to the operation and maintenance (O&M) plan. The O&M plan shall include, but is not limited to:

- (1) Operating parameters of the pollution control device;
- (2) Time table for the routine maintenance of the pollution control device as specified by the manufacturer;
- (3) Time table for routine periodic observations of the pollution control device sufficient to ensure proper operation;
- (4) A list of the type and quantity of the required spare parts for the pollution control device which are stored on the premises of the permit applicant;
- (5) A record log which will indicate, at a minimum:
  - a. When maintenance and observations were performed;
  - b. What maintenance and observations were performed; and
  - c. Who performed said maintenance and observations.
  - d. Acceptable parameter ranges for each operational check.

[Pinellas County Code, Subsection 58-128]

Comments: Reviewed records for the months of 8/1/11 through 9/4/12, the records were in compliance. See

attached copies of the operation and maintenance checklist record. I was not able to perform a visible emissions test at the time,

as no tankers were on site, and not batching at the time of inspection. I asked Mr. Berry to contact AQ Division office next time

they plan to load silo.

Exit Interview: During the closing conference, I told Mr. Berry this emission unit appears to be in non-compliance. I told

him City of Clearwater failed to meet the rule requirements of 62-210.300(4)(d)., F.A.C which states any a change in the name of

the authorized representatives shall notify the Department within 30 days of any changes. I gave Mr. Barry verbal warning and

I told him the City of Clearwater required to send a notification Letter to our office or Florida Department of Environment

Department office. He promised to send our office and DEP office a notification Letter ASAP.
