(check ☑ appropriate by Stack Emissions  1. Were visible emission 62-297, F.A.C.)?  2. Are emissions from some controlled to the extered at a rate that is represented unless such rate is unless such rate is unless to this question is "Y	ens tests conducted during this ensured by the sent necessary to limit visible ensured by the sent necessary to the silo dust colles the sentative of the normal silo los nachievable in practice?the weigh hopper (batcher) op 'es", then continue on to quest	s site visit according to EPA Methods. s), and other enclosed storage and emissions to 5 percent opacity?ector exhaust points was the loading rate, or at least at the minimeteration controlled by the silo dust tions 4.a) and 4.b) below. If answer	ood 9 (Ref.: Chapter	
(check ☑ appropriate by Stack Emissions  1. Were visible emission 62-297, F.A.C.)?  2. Are emissions from so controlled to the extered at a rate that is representated unless such rate is unless such ra	ens tests conducted during this consistent necessary to limit visible entractions tests of the silo dust colles sentative of the normal silo log nachievable in practice?the weigh hopper (batcher) op Yes", then continue on to quest d continue on to question 5.)operation in operation during	s site visit according to EPA Methods. s), and other enclosed storage and emissions to 5 percent opacity?ector exhaust points was the loading rate, or at least at the minimperation controlled by the silo dust tions 4.a) and 4.b) below. If answers the visible emissions test?	ood 9 (Ref.: Chapter	
(check ☑ appropriate by Stack Emissions  1. Were visible emission 62-297, F.A.C.)?  2. Are emissions from so controlled to the extered at a rate that is representate unless such rate is unless such rat	ens tests conducted during this consistent necessary to limit visible elementative of the normal silo log nachievable in practice?the weigh hopper (batcher) op Yes", then continue on to quest d continue on to question 5.) operation in operation during elemissions test, was the batch	s site visit according to EPA Methods, and other enclosed storage and emissions to 5 percent opacity?ector exhaust points was the loading rate, or at least at the minimperation controlled by the silo dust tions 4.a) and 4.b) below. If answers the visible emissions test?ing rate representative of the normal statements.	ood 9 (Ref.: Chapter	
(check ☑ appropriate be Stack Emissions  1. Were visible emission 62-297, F.A.C.)?  2. Are emissions from secontrolled to the extensions of the extension of the extension of the extension of the emission of the emissi	ons tests conducted during this sent necessary to limit visible elions tests of the silo dust colle sentative of the normal silo log nachievable in practice?the weigh hopper (batcher) op 7'es", then continue on to quest d continue on to question 5.) operation in operation during elemissions test, was the batches weigh hopper (batcher) operation, are the visible emissions	s site visit according to EPA Methods. s), and other enclosed storage and emissions to 5 percent opacity?ector exhaust points was the loading rate, or at least at the minimperation controlled by the silo dust tions 4.a) and 4.b) below. If answers, the visible emissions test?ing rate representative of the normation are controlled by a dust collons tests of the weigh hopper (batcomes tests of the weigh hopper (batcomes and storage and storage and sense and sense are single properties.	od 9 (Ref.: Chapter	

PART II: TESTING/RECORDKEEPING REQUIREMENTS – Rule 62-296.414, F.A.C. – (continued)					
(check ☑ appropriate box(es)					
Compliance Demonstration - (Rule 62-296.401(5)(i), F.A.C.)					
1. Is each dust collector exhaust point tested according to the visible emissions limiting standard as part of the	ne				
	⊠Yes □ No				
New Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)					
2. Did this facility demonstrate:					
	□Yes □ No				
b) annual compliance within 60 days prior to each anniversary of the air general permit notification form					
submittal date?	□Yes □ No				
submittai date:	Lies Lino				
Existing Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)					
3. In order to demonstrate annual compliance, was an annual visible emissions test conducted 60days prior to	0				
the AGP Notification form submission, and within 60 days prior to each anniversary date?	∝ Yes				
the AGF Notification form submission, and within 60 days prior to each anniversary date.					
<b>Test Reports</b> – (Rules 62-213.440, F.A.C. and 62-297.310(8)(b), F.A.C.)					
4. Was the required test report filed with the department as soon as practical, but no later than 45 days after the	·he				
test was completed?					
test was completed:	□ 162 □ 140				
PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-210.300(4)(c)2., F.A.C.

PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-296.414(2)(a) and (b), F.A.C. (continued) (check ☑ appropriate box(es))				
Unconfined Emissions – (Rule 62-296.320(4)(c), F.A.C.)  1. Does the owner /operator of the concrete batching plant tak emissions by:  a) management of roads, parking areas, stock piles, and y  1) paving and maintenance of roads, parking areas, sto  2) application of water or environmentally safe dust-stem emissions?	ards, which shall include one or more of the foock piles, and yards? uppressant chemicals when necessary to controly paved areas under control of the owner/operator reduce airborne particulate matter? d breaks to mitigate wind entrainment of	llowing:    Yes   No    - Yes   No    - Yes   No    - Yes   No    - Yes   No		
PART IV: SPECIAL CONDITIONS AND PROCEDURES – I A. New or Modified Process Equipment	Rule 62-210.300(4)(d)4., F.A.C.			
1. Since the last inspection has there been  a) installation of any new process equipment?				
Debbie Telemeco-Anders, ESII	10/29/2007			
Inspector's Name (Please Print)	Date of Inspection	_		
	~ 2008			
Inspector's Signature	Approximate Date of Next Inspection	_		

**COMMENTS:** INS 3. Debbie Telemeco-Anders observed visible emissions compliance test of EU 001 & EU 002. The facility stated that they are planning to close this location 12/2007; however, they may not close until early next year (2008).
