COMMENTS: INS3 - Owner is the only operator, has been in business for 33 years. Only cremates pets for individual owners and cremations are rare.

Crematory Unit constructed in 1977 (Honeywell?).

Facility does not have operational monitoring equipment for continuous monitoring to record the temperature at the point or beyond where 1.0 second residence time is obtained in the secondary chamber combustion zone according to manufacturer's instructions. [See Part III 3.d)]

Facility needs to maintain records of all cremations and record operator name, date, time cremation began in primary chamber and temperature measurements recorded during cremations. Additionally, a file needs to be maintained of all CEMS calibrations, adjustments, preventative maintenance, and corrective maintenance. All records need to be retained for 2 years. [See Part III 1.b)]

Facility needs to provide records of crematory operator training [See Part III 7.a)]
