

CONCRETE BATCHING PLANT

COMPLIANCE INSPECTION CHECKLIST

	NT/DISCOVERY (CI)
RE-INSPECTION (FUI) ARMS CO	MPLAINT NO:
AIRS ID#: 1010007 DATE: <u>09/29/2008</u> ARRIVE: <u>9</u>	11 am DEPART: <u>10:13am</u>
FACILITY NAME: CEMEX CONSTRUCTION MATERIALS, L.P.	
FACILITY LOCATION: 1714 N. Dale Mabry	
LUTZ 33548-3013	
OWNER/AUTHORIZED REPRESENTATIVE: JASON JONES	PHONE: (813)269-1240
CONTACT NAME: Alex Tongan	PHONE: (813)949-3628
ENTITLEMENT PERIOD: 8/18/2007 / 8/18/2012	
(effective date) (end date)	
PART I: INSPECTION COMPLIANCE STATUS (check ☑ only or	e box)
☐ IN COMPLIANCE ☐ MINOR Non-COMPLIANCE ☐	SIGNIFICANT Non-COMPLIANCE
PART II: TESTING/RECORDKEEPING REQUIREMENTS – Rule (check ☑ appropriate box(es))	62-296.414, F.A.C.
	II I
C/ 1 TO .11	
Stack Emissions 1. Were visible emissions tests conducted during this site visit according to the state of t	ing to EPA Method 9 (Ref.: Chapter
Were visible emissions tests conducted during this site visit accord 62-297, F.A.C.)? Are emissions from silos, weigh hoppers (batchers), and other encords.	□Yes No losed storage and conveying equipment
Were visible emissions tests conducted during this site visit accord 62-297, F.A.C.)? Are emissions from silos, weigh hoppers (batchers), and other enc controlled to the extent necessary to limit visible emissions to 5 pc 3. During visible emissions tests of the silo dust collector exhaust po	losed storage and conveying equipment recent opacity? \bigsymbol{\Bar{Y}} Yes \bigsymbol{\Bar{Y}} No ints was the loading of the silo conducted

PART II: TESTING/RECORDKEEPING REQUIREMENTS – Rule 62-296.414, F.A.C. – (continued)		
(check ☑ appropriate box(es)		
Compliance Demonstration - (Rule 62-296.401(5)(i), F.A.C.)		
1. Is each dust collector exhaust point tested according to the visible emissions limiting standard as part of the		
annual compliance demonstration? (Rule 62-297.310(7)(a), F.A.C.)	⊠Yes □ No	
New Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)		
2. Did this facility demonstrate:		
a) initial compliance no later than 30 days after beginning operation?	⊠Yes □ No	
b) annual compliance within 60 days prior to each anniversary of the air general permit notification form		
submittal date?	⊠Yes □ No	
Existing Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)		
3. In order to demonstrate annual compliance, was an annual visible emissions test conducted 60days prior to		
the AGP Notification form submission, and within 60 days prior to each anniversary date?	⊠Yes □ No	
Test Reports – (Rules 62-213.440, F.A.C. and 62-297.310(8)(b), F.A.C.)		
4. Was the required test report filed with the department as soon as practical, but no later than 45 days after t	ihe	
test was completed?	⊠Yes □ No	
	il.	
PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-210.300(4)(c)2., F.A.C.

Inspector's Signature	Approximate Date of Next Inspection	

COMMENTS: Pre-inspection Review: VE Testing was conducted on 9/9/08 for emission units 3, 5, 6, 8, and a weigh hopper dust collector that is not registered in AG permit. The slag silo EU #7 was tested on 11/5/2008. Inspection Findings: According to Mr. Tongan, Plant Operator, the slag silo has not been operational for 3 or 4 months. Facility was loading trucks during my visit. Fuel records indicate they use between 3 and 400 gallons of fuel per day. Sweeper comes by once per week, Mr. Tongan stated they have no water truck only long hoses. Sprinklers were present on piles and in operation during my visit. When I asked, Alex Tongan stated they clean out the IW lagoons about 2 times per week and the bags on dust collectors are changed about once every 6 months. According to Mr. Tongan, this facility has a baghouse on each silo, the central dust collector(CDC) for the truck load out, and the dust collector on the weigh batcher. This means there are 5 emission units instead of only 4. I will need to contact Jason Jones to have the facility re-register. The facility usually processes 11,250 lbs. material per month and fuel delivery notice was supplied upon request verifying fuel sulfur content meets entitlement requirements. Photos were taken during my visit at the facility and are attached to this inspection report. I contacted Jason Jones on 12/1/08 to ask about the dust collector on the weigh batcher. He said he would call Arlington to find out about weigh batcher dust collector. Upon reviewing facility permit records, ARM's indicates EU03 was the weigh batcher dust collector. This unit was not included in the August 2008 permit registration so it was inactivated when 9/08 registration became active. On January 14, 2009 this facility re-registered with the Department and now has 5 active emission units in ARM's. The reason for the delay in re-registering this facility to include the missing weigh hopper was an act of vandalism on the facility. This information is described in detail in the facility's compliance file with conversation records and e-mails beginning January 9, 2009. Photos were taken durig my visit to this site and are attached to this inspection report.
