**COMMENTS:** In a compliance inspection conducted on 4/242/007, AQD staff observed operations at Modern Concrete. The facility has a new yard manager (Pedro Otero) and AQD staff met him for the first time. AQD staff did observe slight emissions coming out near the the boot (fitted to the trucks), however it was under 5 percent opacity. This was brought to Mr. Oteros attention.

AQD staff observed workers watering down the yard and the abutting road to the back of the plant (10<sup>th</sup> Terrace). Mr. Otero submitted watering logs to AQD staff and is in the process of contracting a company to do more of the yard sweeping.

The facility will be conducted their EPA Method 9 Visible Emissions test later in the year.
