PART III: <u>OPERATING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-296.401, F.A.C. (check ☑ appropriate box(es))	
1. Is there <b>Continuous Emissions Monitoring System</b> (CEMS) equipment installed on each unit to record	temperatures in the
primary and secondary chambers where there is a 1.0 second gas residence time in the secondary chamber co	
accordance with the manufacturer's instructions?	
a) Do temperature probes seem to be properly placed?	
b) Are the following records kept on file, available for inspection for at least two years following the re	
measurements, maintenance, reports and records?	cording or such
1) All measurements (including CEMS)	⊠Yes □ No
2) Monitoring device	⊠Yes □ No
3) Performance Testing Measurements	
4) CEMS Performance Evaluation	
5) All CEMS or monitoring device calibration checks	
6) Adjustments	
7) Preventive maintenance performed on systems/devices	
8) Corrective maintenance performed on systems/devices	⊠Yes ☐ No
2. Was this crematory unit constructed: (check only one <b>box</b> )	
a) BEFORE August 30, 1989? (If this box checked, continue on to #3 and skip #4)	
b) or <u>AFTER</u> August 30, 1989? (If this box checked, skip #3 and continue on to #4)	
3. If constructed <b>BEFORE</b> August 30, 1989 is the:	
a) secondary chamber combustion zone providing at least a 1.0 second gas residence time @ <b>1600</b> °F?	∐Yes ∐ No
b) actual operating temperature of the secondary chamber combustion zone no less than 1400°F	
throughout the combustion process in the primary chamber?	☐Yes ☐ No
c) cremation in the primary chamber begun after the secondary chamber combustion zone temperature	
is equal to or greater than 1400°F?	☐Yes ☐ No
d) required monitoring equipment installed and operational, and providing continuous monitoring to	
record the temperature at the point or beyond where 1.0 second gas residence time is obtained in the	
secondary chamber combustion zone according to the manufacturer's instructions?	☐Yes ☐ No
4. If constructed <b>ON</b> or <b>AFTER</b> August 30, 1989 is the:	
a) volume in the secondary combustion zone sufficient to provide at least a 1.0 second gas residence times.	ne
@ 1800° F?	⊠Yes □ No
b) the actual operating temperature of the secondary chamber combustion zone no less than 1600°F	
throughout the combustion process in the primary chamber?	⊠Yes ☐ No
c) secondary chamber combustion zone temperature equal to or greater than 1600°F before the crematic	
process begins in the primary chamber?	Yes ☐ No
5. Are appropriate cremation containers containing no more than 0.5 % (percent) by weight chlorinated	Z 165 110
plastics used during the cremation of dead human bodies?	⊠Yes □ No
a) If the answer to question 4 above is YES, is certifying documentation from the manufacturer that the	
are composed of 0.5% or less by weight chlorinated plastics kept on file at the site for the duration of	
their use and for at least two years after their use?	⊠Yes □ No
b) Are there any other materials, including biomedical wastes (Rule 62-210.200, FAC) incinerated at	□ 100 □ 100
this location?	⊠Yes □ No
6. Have all crematory operators been trained and certified by a Department-approved training program?	
	⊠Yes □ No
a) Are copies of the training certificates for all crematory operators kept on file at the facility for the du	
of the operator's employment & for an additional two years after termination of employment?	⊠Yes ∐ No

PART IV: SPECIAL CONDITIONS AND PROCEDULA. New or Modified Process Equipment	<u>RES</u> – Rule 62-296.401, F.A.C.			
1. Since the last inspection has there been  a) installation of any new process equipment?  b) alterations to existing process equipment with c) replacement of existing equipment substantial recent notification form?  d) If you answered <u>YES</u> to any of the above, die notification form and appropriate fee (Rule 6 local program office?	hout replacement?			
2. If a crematory unit has been modified to the extent that a Department air construction permit was required, have all operators been retrained to operate the modified unit?
