**COMMENTS:** On October 22, 2009 I visited this facility to conduct the annual compliance inspection. On site I met Mr. Alex Sanchez, the dispatcher of the facility. Facility was not opeartional at the time of the inspection. This facility has one silo split in half - one for the cement and another one is for flyash. Each one has it's own dust collector. Facility produces approximately 300 yards of cement per day. I did not observe any fugitive particulates around the facility. A water truck sprinkles water twice a day. A visible emissions test was conducted on August 24, 2009.
