COMMENTS: On December 16, 2009 I visited this facility to conduct the annual compliance inspection and to witness a visible emission test. On site I met Mr.Pablo Arguelles, the facility's supervisor, Mr.Antonio Mazpule, the facility's environmental consultant and Mr.William Arlington, the visible emission tester from Arlington Environmental Services. The VE test started at 1:27 PM. The SE silo was tested and filled with slag at a rate of 9 to 10 PSI. I did not observe any visible emissions from the silo's dust collector. No fugitive particulates were observed. The facility was not operational and was only opened for the VE test. However, they intend to keep the AP Permit active.
